

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		General Biology							
Course Code		TL105		Course Level		Short Cycle (Associate's Degree)			
ECTS Credit	5	Workload	125 (<i>Hours</i>)	Theory	4	Practice	2	Laboratory	0
Objectives of the Course		Togain competency of performing General Biology Applications							
Course Content		The chemical structure of the cell(water, electrolytes,proteins, carbohydrates, lipids,enzymes, vitamins, hormones and nucleic acids),Biological structure of the cell (prokaryotic cell features,eukaryotic cell features, Gram (+) and Gram (-) features),The physical properties of the cell(diffusion, the solution type,the cell membrane transport,osmosis and dialysis)							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Experiment, Demonstration, Discussion, Case Study, Individual Study					
Name of Lecturer(s)									

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	30
Final Examination	1	70
Practice Examination	1	10

Recommended or Required Reading

1	1. Genel Biyoloji Prof. Dr. İlhami Kızıroğlu; 1990 Ankara
2	2. Prof. Dr. Demirsoy A. Yaşamın Temel Kuralları, Hacettepe Üniversitesi Yayınları, Ankara, 1995.
3	3. Kadioğlu, A.; Kaya Y., Genel Botanik, Erzurum 2001.
4	4. Tatlı, Adem. Genel Biyoloji (Botanik), ETAM, Kütahya 1998.

Week	Weekly Detailed Course Contents	
1	Theoretical	The chemical structure of the cell (water, electrolytes)
2	Theoretical	The chemical structure of the cell (proteins, carbohydrates, lipids)
3	Theoretical	The chemical structure of the cell (enzymes, vitamins, hormones and nucleic acids)
4	Theoretical	Biological structure of the cell (eukaryotic cell membrane)
5	Theoretical	Biological structure of the cell (eukaryotic cell organelles-animal)
6	Theoretical	Biological structure of the cell (eukaryotic cell organelles-plant)
7	Theoretical	Biological structure of the cell (eukaryotic cell organelles-plant)
8	Intermediate Exam	Midterm exam
9	Theoretical	Biological structure of the cell (the differences between eukaryotic cells)
10	Theoretical	Biological structure of the cell (prokaryotic cell features)
11	Theoretical	Biological cell structure (Gram (+) and Gram (-) features)
12	Theoretical	The physical properties of the cell (diffusion, the solution type)
13	Theoretical	The physical properties of the cell (liquid systems in living organisms)
14	Theoretical	The physical properties of the cell (the cell membrane transport)
15	Theoretical	The physical properties of the cell (osmosis and dialysis)

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	1	4	70
Lecture - Practice	14	1	2	42
Assignment	4	1	1	8
Midterm Examination	1	2	1	3

Final Examination	1	1	1	2
Total Workload (Hours)				125
[Total Workload (Hours) / 25*] = ECTS				5
*25 hour workload is accepted as 1 ECTS				

Learning Outcomes

1	Knows the concepts of living and inanimate.
2	Knows the molecules that make up the structure of living things.
3	Knows the cell and its structure.
4	Knows cell division and classification of living things.
5	Prepare the preparation. Finds and examines the image under the microscope.

Programme Outcomes (Environmental Health)

1	They have the appropriate level of knowledge about the basic sciences which has an interaction with the environment and the environment itself.
2	They have gained the basic concepts, skills and qualifications in the Environmental health theoretical and practical lessons. And then they can establish the connections that are necessary to protect the environment and people's health in the light of these competencies.
3	They can use the approaches and the information of basic and applied research in different disciplines. They can follow the innovations and developments in their field, and have self-development competency with the terms of the day.
4	They know and apply the analysis methods used in the evaluation of environmental factors (drinking water, waste water treatment, air pollution, meteorological data, land values, food control, radiation measurement, etc.).
5	They have a professional and ethical consciousness, and have the ability to recognize the environmental problems and also can formulate a solution to these problems. They apply the gained knowledges and skills faced in real life situations, transfers the knowledge to individuals around, and wins the life-long learning behavior.
6	They are able to use their professional knowledge in their lives and behave sensitively toward the local and global environmental problems and effectively uses to the legislation and management tools the necessary for the solution.
7	Gained the ability to adapt the changing in a positive way themselves, to understand the core values and cultures of the society which are living. Sensitive to the universal and the social values, interests of the country, have adopted the concept of sustainable development, environmentally conscious, productive, behaves aware of the ethical and professional responsibility.
8	Provides a healthy interact of individual, society and the environment and take responsibility in the necessary situations for the continuity.
9	They gain the ecologically-based solving skills the problems and the delays that may arise in interaction with each other of living and nonliving environment. Interests of local and national, and Ecological and historical values of our country, and contribute to the protection and the development of them.
10	Exhibits the appropriate behaviours for the protection and the development of plants, animals, and inanimate environment, and the especially human health.
11	Knows the value of energy for life, recognizes the types of energy, and have conscious of the importance, using and dissemination of renewable energy sources.
12	Knows the properties of information and communication technologies, and uses them in the process efficiently and professionally.
13	They aware of the democracy, rule of law, human rights, the national and universal cultural characteristics, and sensitive towards to the nature, society and people.
14	Knows the importance of Atatürk's principles and reforms, make them a way of life.
15	Uses effectively the Turkish in speaking and writing.
16	Has at least one foreign language ability to be able to follow the knowledge in their profession and to communicate with colleagues.
17	To have the appropriate knowledge of medical sciences at the level of interest, to use specific medical terms and terminology of field

Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High

	L1	L2	L3	L4	L5
