

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title Chemistry For Laboratory									
Course Code	TL308		Couse Level		Short Cycle (Associate's Degree)				
ECTS Credit 3	Workload	75 (Hours)	Theory	2	Practice	0	Laboratory	0	
Objectives of the Course Atoms into molecules and ionic substances in the chemical properties, chemical reactions, to understand and interpret the solution chemistry to the solution of chemical problems by being able to gain skills to apply.									
Course Content Matter-its properties and morproperties, chemical compo						, the periodic	table and some	atomic	
Work Placement N/A									
Planned Learning Activities and Teaching Methods			Explanatio	n (Presenta	tion)				
Name of Lecturer(s)									

Assessment Methods and Criteria						
Method	Quantity	Percentage (%)				
Midterm Examination	1	40				
Final Examination	1	70				

Recommended or Required Reading

1 Temel Kimya, Anadolu Üniversitesi Yayınları no 672

Week	Weekly Detailed Cour	urse Contents						
1	Theoretical	Chemistry science, matter-its properties and measurement						
2	Theoretical	Atoms and the atomic theory, atomic numbers and isotops						
3	Theoretical	Atoms and the atomic theory, atomic numbers and isotops						
4	Theoretical	The periodic table and some atomic properties						
5	Theoretical	The periodic table and some atomic properties						
6	Theoretical	Chemical formulas, chemical bonds, Lewis structure of compounds						
7	Theoretical	Chemical formulas, chemical bonds, Lewis structure of compounds						
8	Theoretical	Chemical formulas, chemical bonds, Lewis structure of compounds						
9	Intermediate Exam	Mid-term exam						
10	Theoretical	Concentrations of solutions						
11	Theoretical	Concentrations of solutions						
12	Theoretical	To prepare buffer solution						
13	Theoretical	To prepare buffer solution						
14	Theoretical	Aqueous solution reactions						
15	Final Exam	Final exam						

Workload Calculation					
Activity	Quantity	Preparation Duration		Total Workload	
Lecture - Theory	14		1	2	42
Assignment	14		1	1	28
Midterm Examination	1		2	1	3
Final Examination	1		1	1	2
	75				
	3				
*25 hour workload is accepted as 1 ECTS					

Learning Outcomes

- 1 Analyze and demonstrate understanding of properties chemical matter and their states
- Be able to understand the basic principles of chemical reactions and solve chemistry problems of chemical reactions using mathematical tools.

Be able to learn the application of chemistry on daily life.
 To be able to prepare percent solutions
 Prepare solutions in different concentration units

Programme Outcomes (Environmental Health)

- They have the appropriate level of knowledge about the basic sciences which has an interaction with the environment and the environment itself.
- They have gained the basic concepts, skills and qualifications in the Environmental health theorical and practical lessons. And then they can establish the connections that are necessary to protect the environment and people's health in the light of these competencies.
- They can use the approaches and the information of basic and applied research in different disciplines. They can follow the innovations and developments in their field, and have self-development competency with the terms of the day.
- They know and apply the analysis methods used in the evaluation of environmental factors (drinking water, waste water treatment, air pollution, meteorological data, land values, food control, radiation measurement, etc.).
- They have a professional and ethical consciousness, and have the ability to recognize the environmental problems and also can formulate a solution to these problems. They apply the gained knowledges and skills faced in real life situations, transfers the knowledge to individuals around, and wins the life-long learning behavior.
- They are able to use their professional knowledge in their lives and behave sensitively toward the local and global environmental problems and effectively uses to the legislation and management tools the necessary for the solution.
- Gained the ability to adapt the changing in a positive way themselves, to understand the core values and cultures of the society which are living. Sensitive to the universal and the social values, interests of the country, have adopted the concept of sustainable development, environmentally conscious, productive, behaves aware of the ethical and professional responsibility.
- Provides a healthy interact of individual, society and the environment and take responsibility in the necessary situations for the continuity.
- They gain the ecologically-based solving skills the problems and the delays that may arise in interaction with each other of living and nonliving environment. Interests of local and national, and Ecological and historical values of our country, and contribute to the protection and the development of them.
- Exhibits the appropriate behaviours for the protection and the development of plants, animals, and inanimate environment, and the especially human health.
- Knows the value of energy for life, recognizes the types of energy, and have conscious of the importance, using and dissemination of renewable energy sources.
- Knows the properties of information and communication technologies, and uses them in the process efficiently and professionally.
- They aware of the democracy, rule of law, human rights, the national and universal cultural characteristics, and sensitive towards to the nature, society and people.
- 14 Knows the importance of Ataturk's principles and reforms, make them a way of life.
- 15 Uses effectively the Turkish in speaking and writing.
- Has at least one foreign language ability to be able to follow the knowledge in their profession and to communicate with colleagues.
- To have the appropriate knowledge of medical sciences at the level of interest, to use specific medical terms and terminology of field

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2:Low, 3: Medium, 4: High, 5: Very High

	L1	L2	L3	L4	L5
P1	4	4	4	4	4
P3	4	4	5	5	4
P4	4	4	5	5	4
P6	5	4	5	5	4
