

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title Introduction to System Diseases			ases						
Course Code	AN304		Couse Level		Short Cycle (Associate's Degree)				
ECTS Credit 3	Workload	76 (Hours)	Theory		2	Practice	0	Laboratory	0
Objectives of the Course Student will gain basic knowledge about disease, health, human body and most seen diseases.									
Course Content İnsan vücudu, hastalıklar ve tanı.			e tanı.						
Work Placement N/A									
Planned Learning Activities and Teaching Methods Explanation (Presentation), Discussion									
Name of Lecturer(s) Ins. Nesrin OĞURLU									

Assessment Methods and Criteria

Method	Quantity	Percentage (%)	
Midterm Examination	1	40	
Final Examination	1	70	

Recommended or Required Reading

1 Karadakovan A; Eti Aslan F; Care in internal and surgical diseases Nobel Bookstore 2010

Week	Weekly Detailed Course Contents				
1	Theoretical	Disease and health concepts			
2	Theoretical	Human body and systems			
3	Theoretical	Systems' characteristics			
4	Theoretical	Medical history and its importance			
5	Theoretical	Physical examination and its importance			
6	Theoretical	General patient evaluation			
7	Theoretical	General patient evaluation			
8	Theoretical	Midterm Exam			
9	Theoretical	Signs and problems about general situation			
10	Theoretical	Signs and problems about general situation			
11	Theoretical	Mosty used diagnostic methods			
12	Theoretical	Traditional therapy methods and adverse effects			
13	Theoretical	Adult and child immunization			
14	Theoretical	Adult and child immunization			
15	Final Exam	Final Exam			

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload	
Lecture - Theory	14	3	2	70	
Midterm Examination	1	2	1	3	
Final Examination	1	2	1	3	
Total Workload (Hours)					
[Total Workload (Hours) / 25*] = ECTS 3					
*25 hour workload is accepted as 1 ECTS					

Learning Outcomes

1	Can know disease and health concepts.	
2	Can know systems and organs	
3	Can evaluate general patient	
4	Can know the signs of patients' general situation	

 8 Provides a healthy interact of individual, society and the environment and take responsibility in the necessary situations for the continuity. 9 They gain the ecologically-based solving skills the problems and the delays that may arise in interaction with each other of living and nonliving environment. Interests of local and national, and Ecological and historical values of our country, and contribute to the protection and the development of them. 10 Exhibits the appropriate behaviours for the protection and the development of plants, animals, and inanimate environment, and the especially human health. 11 Knows the value of energy for life, recognizes the types of energy, and have conscious of the importance, using and dissemination of renewable energy sources. 12 Knows the properties of information and communication technologies, and uses them in the process efficiently and professionally. 13 They aware of the democracy, rule of law, human rights, the national and universal cultural characteristics, and sensitive towards to the nature, society and people. 14 Knows the importance of Ataturk's principles and reforms, make them a way of life. 15 Uses effectively the Turkish in speaking and writing. 16 Has at least one foreign language ability to be able to follow the knowledge in their profession and to communicate with colleagues. 17 To have the appropriate knowledge of medical sciences at the level of interest, to use specific medical terms and terminology 	Progr	amme Outcomes (Environmental Health)
 then they can establish the connections that are necessary to protect the environment and people's health in the light of these competencies. They can use the approaches and the information of basic and applied research in different disciplines. They can follow the innovations and developments in their field, and have self-development competency with the terms of the day. They know and apply the analysis methods used in the evaluation of environmental factors (drinking water, waste water treatment, air pollution, meteorological data, land values, food control, radiation measurement, etc.). They have a professional and ethical consciousness, and have the ability to recognize the environmental problems and also can formulate a solution to these problems. They apply the gained knowledges and skills faced in real life situations, transfers the knowledge to individuals around, and wins the life-long learning behavior. They are able to use their professional knowledge in their lives and behave sensitively toward the local and global environmental problems and effectively uses to the legislation and management tools the necessary for the solution. Gained the ability to adapt the changing in a positive way themselves, to understand the core values and cultures of the society which are living. Sensitive to the universal and the social values, interests of the country, have adopted the concept of sustainable development. Interests of local and national, and Ecological and historical values of our country, and continuity. Provides a healthy interact of individual, society and the environment of plants, animals, and inanimate environment, and the especially human health. Knows the value of energy for life, recognizes the types of energy, and have conscious of the importance, using and dissemination of renewable energy sources. Knows the nature, society and people. Knows the inportance of Ataturk's principles and reforms, make them a w	1	
 innovations and developments in their field, and have self-development competency with the terms of the day.
