

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

	I							
Course Title Human Physiology								
Course Code	AN105	Couse L		Short Cycle (Associate's Degree)				
ECTS Credit 2	Workload 48 (Hours)	Theory	, 2	2 Practice 0 Laborat		Laboratory	0	
Objectives of the Course It is aimed to teach the information and skills related to the base functions of the body, and the structure made up the systems and organs' physiological features.						structure		
Course Content It is aimed to teach the information and skills related to the base functions of the body, and the structure made up the systems and organs' physiological features.					structure			
Work Placement N/A								
Planned Learning Activities and Teaching Methods			ation (Presentat	tion), Individua	l Study			
Name of Lecturer(s)	Ins. Aslı ÇANAKÇI							

Assessment Methods and Criteria					
Method	Quantity	Percentage (%)			
Midterm Examination	1	40			
Final Examination	1	70			

Recommended or Required Reading

1 Medical physiology. Ganong, W.F.

Week	Weekly Detailed Course Contents					
1	Theoretical	Basic concepts and terms of physiology				
2	Theoretical	Cell's tasks				
3	Theoretical	Respiratory mechanism				
4	Theoretical	Oxygen and carbondioxyde transfer and functions in blood				
5	Theoretical	Oxygen and carbondioxyde transfer and functions in blood				
6	Theoretical	Heart functions				
7	Theoretical	Blood and lymph circulation				
8	Intermediate Exam	Midterm exam				
9	Theoretical	Blood and liquid electrolytes				
10	Theoretical	Central nervous system				
11	Theoretical	Peripheral nervous system				
12	Theoretical	Endocrine system				
13	Theoretical	Excretory system				
14	Theoretical	Digestive system				
15	Theoretical	Sense organs				

Workload Calculation						
Activity	Quantity		Preparation	Duration		Total Workload
Lecture - Theory	14		1	2		42
Midterm Examination	1		2	1		3
Final Examination	1		2	1		3
Total Workload (Hours)						48
[Total Workload (Hours) / 25*] = ECTS						2
*25 hour workload is accepted as 1 ECTS						

Learn	Learning Outcomes					
1	Know the physiological structure of the human body					
2	Know the physiology of respiratory system					
3	Know the physiology of circulatory system					
4	Know the physiology of nervous system					

Programme Outcomes (Dialysis)

- To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
- 2 To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
- To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
- To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
- 5 To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
- To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
- 7 To be able to acquire dialysate characteristics, have necessary skills on preparation and application
- 8 To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
- To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
- To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
- To be able to understand periodic examinations during the follw up dialysis patients and recognize pathologies in the early period, and have the knowledge and skills to take necessary precautions in time
- To be able to have the knowledge of the dialysis patients, physiological, social and psychological problems, and perform necessary support skills on these issues for the patient
- In general to be able to comprehend the knowledge of, drugs, dosage, side effects, and toxic effects, routes of administration of drugs and drug use in patients with chronic renal failure
- To be able to acquire a high level knowledge of fluid and electrolyte problems with general issues nephrology, acid-base balance disorder, nephrology and urology kidney disease, chronic and acute renal failure.
- To be able to comprehend the methods of diagnosis and treatment of diseases of the system, and have knowledge of fighting and protecting from especially problems that can be seen in dialysis patients as level of practitioner and getting patient compliance.
- To be able to have knowledge of statistics and research methods as a level of following the developments, monitoring and interpreting scientific publications.
- 17 To be able to gain the knowledge of foreign language as a level of communicating and following developments.
- To be able to be willing to self-improvement as an individual committed to the principles and reforms of Atatürk and keeping on the some of the rules of social life, customs and traditions, depending on the interests of the country on their own interests as a member of society,

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2:Low, 3:Medium, 4:High, 5: Very High

	L1	L2	L3	L4	L5
P2	5	5	5	5	5
P14	2	2	2	2	2
P15	2	2	2	2	2
P16	1	1	1	1	1
