

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Nutrition In Dialysis Patients							
Course Code		DY104		Coure Level		Short Cycle (Associate's Degree)			
ECTS Credit	3	Workload	74 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course		In this course, the food groups, adequate, balanced and healthy diet aims to develop knowledge and skills regarding the rules.							
Course Content		Food groups, adequate and balanced nutrition, healthy eating principles							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Discussion, Individual Study					
Name of Lecturer(s)		Ins. Tuğçe OKTAV							

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	70

Recommended or Required Reading

1	Lecture Notes
---	---------------

Week	Weekly Detailed Course Contents	
1	Theoretical	Health and Nutrition
2	Theoretical	Nutrients, Carbohydrates, Proteins
3	Theoretical	Nutrients, Oils and Vitamins
4	Theoretical	Minerals
5	Theoretical	Drinks and Fluid Balance
6	Theoretical	Food Groups (Meat and Meat Products, Milk and Milk
7	Theoretical	Food Groups (Legumes and Cereals, Oils)
8	Intermediate Exam	MID-TERM
9	Theoretical	Adequate and Balanced Nutrition Policy
10	Theoretical	Nutritional Pyramids and Change Lists
11	Theoretical	Meet the energy demand
12	Theoretical	Obesity and Caused by Diseases
13	Theoretical	Special Situations Nutrition (Pregnancy, Breastfeeding, Infant, Child and Adolescent nutrition)
14	Theoretical	Special Situations Nutrition (Chronic Diseases, diabetes mellitus, hypertension, CHF, etc.).
15	Theoretical	Principles of Nutrition Dialysis Patients

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	2	28
Assignment	8	0	3	24
Seminar	10	0	2	20
Midterm Examination	1	0	1	1

Final Examination	1	0	1	1
Total Workload (Hours)				74
[Total Workload (Hours) / 25*] = ECTS				3
*25 hour workload is accepted as 1 ECTS				

Learning Outcomes

1	To be able to gain the knowledge of food groups
2	To be able to understand the importance of adequate and balanced nutrition.
3	Adequate and balanced nutrition
4	Nutrition in special cases
5	Learn how to nourish the damage of dialysis

Programme Outcomes (Dialysis)

1	To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
2	To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
3	To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
4	To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
5	To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
6	To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
7	To be able to acquire dialysate characteristics, have necessary skills on preparation and application
8	To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
9	To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
10	To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
11	To be able to understand periodic examinations during the follow up dialysis patients and recognize pathologies in the early period, and have the knowledge and skills to take necessary precautions in time
12	To be able to have the knowledge of the dialysis patients, physiological, social and psychological problems, and perform necessary support skills on these issues for the patient
13	In general to be able to comprehend the knowledge of, drugs, dosage, side effects, and toxic effects, routes of administration of drugs and drug use in patients with chronic renal failure
14	To be able to acquire a high level knowledge of fluid and electrolyte problems with general issues nephrology, acid-base balance disorder, nephrology and urology kidney disease, chronic and acute renal failure.
15	To be able to comprehend the methods of diagnosis and treatment of diseases of the system, and have knowledge of fighting and protecting from especially problems that can be seen in dialysis patients as level of practitioner and getting patient compliance.
16	To be able to have knowledge of statistics and research methods as a level of following the developments, monitoring and interpreting scientific publications.
17	To be able to gain the knowledge of foreign language as a level of communicating and following developments.
18	To be able to be willing to self-improvement as an individual committed to the principles and reforms of Atatürk and keeping on the some of the rules of social life, customs and traditions, depending on the interests of the country on their own interests as a member of society,

Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High
