Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Discussion, Case Study, Project Based Study, Individual Study					
Name of Lecturer(s)		Ins. Tuğçe OKTAV							

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Final Examination	1	70
Practice	4	20
Term Assignment	1	20

Recommended or Required Reading

1	human sciences
---	----------------

Week	Weekly Detailed Course Contents	
1	Theoretical	Health, disease, patient, therapy, life, death
2	Theoretical	Health and disease of different cultures.
3	Theoretical	Poems- Health, disease, patient, therapy, life, death
4	Theoretical	Art and health and death
5	Theoretical	Music and health and disease
6	Theoretical	Stories and health and disease
7	Theoretical	Novels and health and disease
8	Intermediate Exam	Midterm Poject evaluation
9	Theoretical	Ancient therapies
10	Theoretical	Cinema- health, disease, patient, life, death
11	Theoretical	Dance - life and death
12	Theoretical	Vegetative state and art
13	Theoretical	Personal student presantations
14	Theoretical	Personal student presantations
15	Final Exam	Final Project Evaluation

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	3	2	70
Midterm Examination	1	1	1	2
Final Examination	1	2	1	3
Total Workload (Hours)				75
[Total Workload (Hours) / 25*] = ECTS				3
*25 hour workload is accepted as 1 ECTS				

Learning Outcomes

1	Can build a relation with empathy with patients
2	Can behave humanistic to the patients
3	Can understand the importance of their jobs
4	provide an artistic perspective in medicine

5	learn different treatment methods
---	-----------------------------------

Programme Outcomes (Dialysis)

1	To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
2	To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
3	To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
4	To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
5	To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
6	To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
7	To be able to acquire dialysate characteristics, have necessary skills on preparation and application
8	To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
9	To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
10	To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
