

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Project Management							
Course Code		TS805		Course Level		Short Cycle (Associate's Degree)			
ECTS Credit	2	Workload	45 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course		To increase of knowledge, awareness and application skills on subjects about developing project's opinion, organizing the Project team and stakeholders, projects writing and Project management in health sciences field.							
Course Content		Basic principles and practical examples on development of the project's opinion and management in health sciences field							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Discussion, Project Based Study, Individual Study					
Name of Lecturer(s)		Assoc. Prof. Erman ORYAŞIN, Lec. Şengül ŞENTÜRK							

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	60

Recommended or Required Reading

1	Proje Yönetimi Kitap, Avrupa Konseyi Yayınları Strasbourg Avrupa Konseyi ve Avrupa Komisyonu, Kasım 2000
---	----------------------------------------------------------------------------------------------------------

Week	Weekly Detailed Course Contents	
1	Theoretical	Description of project and management
2	Theoretical	Importance of development project's opinion in health sciences field
3	Theoretical	Problem analysis, aim analysis
4	Theoretical	Strategy analysis and stakeholders analysis
5	Theoretical	General aims and determination of the project's goal.
6	Theoretical	Planning of the activities and timing
7	Theoretical	Risk analysis and planning of the resources
8	Theoretical	Risk analysis and planning of the resources
9	Theoretical	The logical framework matrix
10	Theoretical	Monitoring and evaluation, sustainability
11	Theoretical	Sample applications
12	Theoretical	Sample applications
13	Theoretical	Sample applications
14	Theoretical	Sample applications

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	1	2	42
Project	1	0	1	1
Midterm Examination	1	0	1	1
Final Examination	1	0	1	1
Total Workload (Hours)				45
[Total Workload (Hours) / 25*] = ECTS				2

*25 hour workload is accepted as 1 ECTS

Learning Outcomes

1	Comprehends of importance to developing project's opinion and outcomes to field and stakeholders
2	Describes of the project's cycles concept
3	Implements the arrangements project's steps using with multidisciplinary and interdisciplinary approaches.

4	Recognizes the stakeholders in health sciences field.
5	Students will be able to evaluate problems and solutions in health projects.

Programme Outcomes (Dialysis)

1	To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
2	To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
3	To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
4	To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
5	To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
6	To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
7	To be able to acquire dialysate characteristics, have necessary skills on preparation and application
8	To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
9	To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
10	To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
11	To be able to understand periodic examinations during the follow up dialysis patients and recognize pathologies in the early period, and have the knowledge and skills to take necessary precautions in time
12	To be able to have the knowledge of the dialysis patients, physiological, social and psychological problems, and perform necessary support skills on these issues for the patient
13	In general to be able to comprehend the knowledge of, drugs, dosage, side effects, and toxic effects, routes of administration of drugs and drug use in patients with chronic renal failure
14	To be able to acquire a high level knowledge of fluid and electrolyte problems with general issues nephrology, acid-base balance disorder, nephrology and urology kidney disease, chronic and acute renal failure.
15	To be able to comprehend the methods of diagnosis and treatment of diseases of the system, and have knowledge of fighting and protecting from especially problems that can be seen in dialysis patients as level of practitioner and getting patient compliance.
16	To be able to have knowledge of statistics and research methods as a level of following the developments, monitoring and interpreting scientific publications.
17	To be able to gain the knowledge of foreign language as a level of communicating and following developments.
18	To be able to be willing to self-improvement as an individual committed to the principles and reforms of Atatürk and keeping on the some of the rules of social life, customs and traditions, depending on the interests of the country on their own interests as a member of society,

Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High
