

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Prevention From Infectious Diseases							
Course Code		TG801		Course Level		Short Cycle (Associate's Degree)			
ECTS Credit	2	Workload	52 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course		Safety tips for students with information about infectious diseases and is a course ofin programs.							
Course Content		Chain of infection infection definition and parts, welding factors affecting transmission path and sensitive individuals Water, air and blood via transmitted diseases Disease-related intervention opportunities available Health promotion, primary, secondary, and tertiary protection In Turkey and in the world of infectious diseases dimensions International and national reporting mandatory diseases Infectious disease-related legislation topics							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Case Study, Individual Study					
Name of Lecturer(s)		Lec. Nesrin OĞURLU							

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	60

Recommended or Required Reading

1	Tekeli, E., Çevik, M.A., Karakoç, E., "İnfeksiyon Hastalıkları El Kitabı- Handbook Of Infectious Diseases" (çeviri), Bilimsel Tıp Yayınevi, Ankara, 2003.
---	---

Week	Weekly Detailed Course Contents	
1	Theoretical	Health and disease concepts-Introduction to infectious diseases
2	Theoretical	Definition of infection and parts of the infection chain
3	Theoretical	infectious diseases and prevention
4	Theoretical	Epidemiology of infectious diseases
5	Theoretical	Diseases with blood and blood products
6	Theoretical	Protection from blood-borne diseases and monitoring of risky wounds
7	Theoretical	water and foodborne diseases
8	Theoretical	protection from water and foodborne diseases and food safety
9	Theoretical	protection from water and foodborne diseases and food safety
10	Theoretical	airborne diseases and ways of protection
11	Theoretical	principles of public health and public health
12	Theoretical	principles of public health and public health
13	Theoretical	Definition of surveillance and surveillance of infectious diseases
14	Theoretical	infectious disease notification system

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	2	28
Individual Work	4	1	1	8
Midterm Examination	1	7	1	8
Final Examination	1	7	1	8
Total Workload (Hours)				52
[Total Workload (Hours) / 25*] = ECTS				2

*25 hour workload is accepted as 1 ECTS

Learning Outcomes

1	Provides general information about infectious diseases.
2	Learn the concepts of infectious diseases and the ways of transmission of diseases.
3	Know and apply the measures to be taken against epidemics in case of disaster.
4	Knows the general characteristics of infectious agents and learns the treatment methods.
5	Knows the ways of transmission of diseases and learns to prevent possible epidemic diseases in case of emergency.

Programme Outcomes (Dialysis)

1	To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
2	To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
3	To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
4	To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
5	To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
6	To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
7	To be able to acquire dialysate characteristics, have necessary skills on preparation and application
8	To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
9	To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
10	To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
11	To be able to understand periodic examinations during the follow up dialysis patients and recognize pathologies in the early period, and have the knowledge and skills to take necessary precautions in time
12	To be able to have the knowledge of the dialysis patients, physiological, social and psychological problems, and perform necessary support skills on these issues for the patient
13	In general to be able to comprehend the knowledge of, drugs, dosage, side effects, and toxic effects, routes of administration of drugs and drug use in patients with chronic renal failure
14	To be able to acquire a high level knowledge of fluid and electrolyte problems with general issues nephrology, acid-base balance disorder, nephrology and urology kidney disease, chronic and acute renal failure.
15	To be able to comprehend the methods of diagnosis and treatment of diseases of the system, and have knowledge of fighting and protecting from especially problems that can be seen in dialysis patients as level of practitioner and getting patient compliance.
16	To be able to have knowledge of statistics and research methods as a level of following the developments, monitoring and interpreting scientific publications.
