

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title Environmental Awareness								
Course Code	ÇS801		Couse Level		Short Cycle (Associate's Degree)			
ECTS Credit 2	Workload 75	5 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course Environmental science, environmental problems, global environmental problems, solutions for environmental problems, environmental law and procedures					mental			
Course Content What is environment, Environmental pollution and its effect, Ozone layer, Alternate energy sources, warming and climate change, Impotance of biological diversity, Natural and international laws regardless environmental problems.								
Work Placement N/A								
Planned Learning Activities and Teaching Methods Expla				n (Presentat	ion)			
Name of Lecturer(s) Ins. Hayriye Nurcan SÖBÜTAY								

Assessment Methods and Criteria					
Method	Quantity Percentage (
Midterm Examination	1	40			
Final Examination	1	60			

Recommended or Required Reading

- 1 Çevre Bilgisi- Yrd. Doç. Dr. Recep Bozyiğit, Öğr. Gör. Tufan Karaaslan
- 2 Yeşil Yönetim ve Çevre Bilinci- Dr. Ergün Kara

Week	Weekly Detailed Course Contents				
1	Theoretical	What is environment			
2	Theoretical	Enviromental pollution and its effects			
3	Theoretical	Enviromental problems			
4	Theoretical	Air Pollution			
5	Theoretical	Water Pollution			
6	Theoretical	Waste Pollution			
7	Theoretical	Soil Pollution			
8	Theoretical	Soil Pollution			
9	Theoretical	Nuclear, radioaktive and electromagnetic pollution			
10	Theoretical	Noise and its effcts			
11	Theoretical	Ozone layer			
12	Theoretical	Alternate energy sources			
13	Theoretical	Global warming and climate change			
14	Theoretical	Impotance of biological diversity			

Workload Calculation					
Activity	Quantity	Preparation	Duration	Total Workload	
Lecture - Theory	14	2	2	56	
Individual Work	13	0	1	13	
Midterm Examination	1	2	1	3	
Final Examination	1	2	1	3	
	75				
[Total Workload (Hours) / 25*] = ECTS 3					
*25 hour workload is accepted as 1 ECTS					

Learning Outcomes

- 1 Understanding of environmental science
- 2 Defining of global and national environmental problems

Impotance of alternate energy sources
Importance of biological diversity
Understanding of environmental laws and procedures

Programme Outcomes (Dialysis)

- To be able to comprehend the duties and responsibility of dialysis technicians. To be able to work in a team with members of other health professions.
- 2 To be able to acquire a general knowledge of human anatomy, physiology and biochemistry
- To be able to gain knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
- To be able to have knowledge of blood-borne infectious diseases, especially infectious diseases such as hepatitis and universal prevention methods
- 5 To be able to recognize hemodialysis machine, and have knowledge and skills will be used it during operation of dialysis
- To be able to have the knowledge of application on peritoneal dialysis and skills be able to train patient on this.
- 7 To be able to acquire dialysate characteristics, have necessary skills on preparation and application
- ⁸ To be able to gain the knowledge and skills on the basic principles of water treatment, application methods, and control of purified water as a level of practitioner
- To be able to comprehend the principles of patient care, complications during dialysis operation what patients may be encounter and perform necessary knowledge and skills to take necessary measures to protect patient from these complications.
- 10 To be able to gain knowledge and equipment related to educating on problems that the long-term dialysis patients may have.
- To be able to understand periodic examinations during the follw up dialysis patients and recognize pathologies in the early period, and have the knowledge and skills to take necessary precautions in time
- To be able to have the knowledge of the dialysis patients, physiological, social and psychological problems, and perform necessary support skills on these issues for the patient
- In general to be able to comprehend the knowledge of, drugs, dosage, side effects, and toxic effects, routes of administration of drugs and drug use in patients with chronic renal failure
- To be able to acquire a high level knowledge of fluid and electrolyte problems with general issues nephrology, acid-base balance disorder, nephrology and urology kidney disease, chronic and acute renal failure.
- To be able to comprehend the methods of diagnosis and treatment of diseases of the system, and have knowledge of fighting and protecting from especially problems that can be seen in dialysis patients as level of practitioner and getting patient compliance.
- To be able to have knowledge of statistics and research methods as a level of following the developments, monitoring and interpreting scientific publications.
- 17 To be able to gain the knowledge of foreign language as a level of communicating and following developments.
- To be able to be willing to self-improvement as an individual committed to the principles and reforms of Atatürk and keeping on the some of the rules of social life, customs and traditions, depending on the interests of the country on their own interests as a member of society,

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High
