**Learning Outcomes**

1	Recognize and apply the concepts that will support visual perception such as color, texture, which can detect the volumetric dimensions of objects.
2	Know and apply the basic concepts of motion, proportion-dimension, union, metamorphosis.
3	Know and apply properties such as equilibrium, being single in all forms.
4	Create three dimensional forms and compositions using organic and mechanical objects.
5	Knows and applies the techniques and adaptation of the skills and knowledge gained to the jewelry.
