| Objectives of the Course In this lesson, students choosing a microcontroller as a problem to solve, this will set up the algorith that creates the solution and flow diagram for microcontroller. The algorithm that creates the microcontroller with, after you fix the errors by performing commands compiled program microcontroller. |   |  |             |   |                                  |         |            |   |  |
| Course Content   | Differences between microprocessor systems and microcontroller systems, Algorithms, Flow diagra Microcontroller commands, Microcontroller and keypad circuits |  |             |   |                                  | agrams, |            |   |  |

## **Learning Outcomes**

- 1 select the appropriate microprocessor Work
- 2 to install the Program on the microcontroller

| 3  | create the algorithm and the solution to the flow diagram |  |
|----|---|--|
| 4  | registrars to use Microcontroller                         |  |
| 5  | use the Microcontroller commands                          |  |
| 6  | write programs with microcontroller basic input output    |  |
| 7  | Program to compile and edit errors                        |  |
| 8  | to make buttons and LED applications with microcontroller |  |
| 9  | set up the 7 segment display circuit with microcontroller |  |
| 10 | set up the 7 segment display circuit with microcontroller |  |
