

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Environment Protection							
Course Code		AET257		Course Level		Short Cycle (Associate's Degree)			
ECTS Credit	2	Workload	50 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course		The aim of this course is to explain the importance of preventing environmental pollution by increasing the sensitivity to the environment. The methods and methodologies to be used for effective environmental protection will be explained in the course by discussing how countries can help in an effective and efficient way for large scale measures. After taking this course, students are expected to have a basic understanding and knowledge to be more sensitive and conscious to the environment.							
Course Content		They will learn the importance and critical issues of air, water, soil pollution, recycling, environmental awareness, environmental protection. - learn the basic tools, techniques and principles of environmental protection.							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Discussion, Case Study					
Name of Lecturer(s)		Ins. Aysun SAHİN							

### Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	70

### Recommended or Required Reading

1	Serpil BARDAKÇI TOSUN, Slayt-Researching articles
---	---

Week	Weekly Detailed Course Contents	
1	Theoretical	Introduction, What is the environment? Who are affected positively and negatively by environmental problems?
2	Theoretical	Physicochemical Processes of Environmental Management
3	Theoretical	Air, soil and water pollution control and analysis of physical and chemical principles of waste processes
4	Theoretical	Process Dynamics / Sedimentation, Coagulation, Filtration, Adsorption, Oxidation; Pesticides
5	Theoretical	Air Pollution / Radioactive Pollutants
6	Theoretical	Water Pollution; Disposal of Solid Wastes
7	Theoretical	Environmental impact assessment
8	Intermediate Exam	Exam-1
9	Theoretical	Environmental Management / Environmental Microbiology
10	Theoretical	Water Quality Management
11	Theoretical	Air Pollution Control
12	Theoretical	Air Pollution Control
13	Theoretical	Turkey's environmental problems, the measures and actions taken regarding environmental pollution in the world
14	Theoretical	Turkey's environmental problems, the measures and actions taken regarding environmental pollution in the world

### Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	2	28
Midterm Examination	1	10	1	11
Final Examination	1	10	1	11
Total Workload (Hours)				50
[Total Workload (Hours) / 25*] = ECTS				2

\*25 hour workload is accepted as 1 ECTS

**Learning Outcomes**

1	They are aware of environmental problems.
2	To know the natural resources and their properties
3	Knows ecosystems, biosphere, energy use and environment relations.
4	Knows the relations between nuclear energy and environment
5	Knows atmospheric pollution and pollutants
6	Knows water pollution and sources
7	Knows soil pollution and sources
8	Interprets the relations between agriculture and environment, pest sites and environmental pollution
9	Knows the methods of preparing environmental impact assessment report
10	Prepares environmental impact assessment report

**Programme Outcomes (Automotive Technology)**

1	Using the basic knowledge and skills acquired in his/her field of study, to have the ability to evaluate and interpret the data, to define and analyze the problems, to make solution suggestions based on evidence and proofs.
2	To choose and use efficiently contemporary techniques and means as well as information technologies required for the applications related to the field of study.
3	The ability to apply the processes related to industrial and service sector by examining.
4	To gain the ability to produce solutions to unforeseen situations, take responsibility in teams and to have the skill to conduct individual works.
5	To achieve an awareness of the necessity of lifelong learning and consistently self-improving besides of following the developments in science and technology.
6	To become skillful at using computer hardware and software in a baseline level required by the field of study.
7	To be aware of Business Law, Job Security, environmental protection and quality concepts.
8	To have a command of communication skills and foreign language in order to communicate efficiently and follow the latest developments in his/her field of study.
9	Acquiring enough conceptual and applied knowledge in Mathematics, Science and Basic Engineering issues related to his/her field.
10	To plan the processes in automotive technology field to meet the expectations of the sector.
11	To become skillful at making designs by means of technical and computer-aided drawings and simulation programs, and by using various software programs to be able to choose systems and components required in by the field apart from making the basic sizing computations and drawing the architectural and static projects and details.
12	Ability to use the methods and techniques of career planning and discussing the effects of character traits on career preferences.
13	To provide them with knowledge about substance use and addiction problem and prevention methods.

**Contribution of Learning Outcomes to Programme Outcomes** 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High

	L1	L2	L3	L4	L5	L6	L7	L8	L9	L10
