Learning Outcomes

- 1 Students will comprehend the service structure.
- 2 Students' knowledge and skills related to increasing service efficiency is improved.
- 3 Student understands the integrity of skills and knowledge that will enable technical equipment and processes to be sufficient in service processes
- 4 Understands the knowledge and skills that employees should have according to the characteristics of the student service workshop
- 5 Students will be able to comprehend the importance of monitoring and application of new technological developments

Programme Outcomes (Automotive Technology)

- To be able to interpret and evaluate data, identify problems, analyze them, and develop evidence-based solutions by using basic knowledge and skills in the field.
- 2 Must be able to choose and effectively use the modern techniques, tools and information technologies necessary for field related applications.
- 3 Must be able to gain practical skills by examining relevant processes in industry and service sector on site.
- They must be able to produce solutions, take responsibility for teams or do individual work when they encounter situations unforeseen in the field related applications.
- Awareness of the need for lifelong learning; it must be able to follow the developments in science and technology and to constantly renew itself.
- Must be able to use computer software and hardware at the basic level required by the field
- 7 Must have job security, worker health, environmental protection knowledge and quality awareness.
- 8 He must possess a level of foreign language knowledge that is capable of following the innovations in his area of expertise and communication techniques.
- 9 Must be able to acquire basic theoretical and practical knowledge about the field in mathematics, science and basic engineering.
- 10 It should have the ability to plan the processes / processes of the Automotive Program to meet the expectations of the sector.
- To be able to design the systems and components related to the field by using technical drawing, computer aided drawing, designing using simulation programs and using various softwares, to be able to make basic sizing calculations, to be able to master professional plans and projects.
