

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Laboratory Techniques and Safety							
Course Code		LBT113		Course Level		Short Cycle (Associate's Degree)			
ECTS Credit	2	Workload	50 (Hours)	Theory	1	Practice	2	Laboratory	0
Objectives of the Course		It has been proved statistically that a very low rate of accidents occurring in laboratories and production areas originate from technical errors and 85% from human errors. Lack of information about the substance being studied or not being shown the necessary attention and wrong habits play an important role in the accident. The other side, laboratories have great importance in chemistryIt is extremely important for students to be trained in laboratory work and techniques without starting laboratory work. The protection of the community and the environment is directly related to the individual behavior, knowledge and skills of the staff working in the laboratory. Our aim is to educate our students to learn about chemicals, hazards, safety precautions and protection methods and to inform them about working in a safe environment with less errors in their work and daily life and to have knowledge about the laboratory techniques to use in the field of chemistry.							
Course Content		Basic principles and practices in ensuring a safe working environment, Classification of chemicals used in laboratories, Labeling, storage and usage information, Labeling, material safety data (MSDSs), Safety equipment: personal protective equipment, Storage and disposal of waste chemistries chemicals that should not be in contact with each other, Laboratory accidents and first aid emergency medical operations: selection, preparation, use of first aid / necessary tools, equipment, materials, equipment and protective equipment, introduction, functions, cleaning of glassware, Establishment of basic laboratory procedures and devices, Execution and termination of reactions and purification techniques, Separation techniques and chromatographic introduction							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Demonstration, Discussion, Individual Study					
Name of Lecturer(s)		Ins. Hilal DEMİRPENÇE							

Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	60

Recommended or Required Reading

1	Prof Dr. Mahmure Üstün Özgür, Kimyasallar ve Tehlikeleri Dersi Ders Notları, İş Sağlığı ve Güvenliği Bölümü, Meslek Yüksek Okulu, YTÜ, 2004-2005
2	Laboratuvar Güvenliği, Prof. Dr. Handan Ak Çelik, 2004
3	Prof. Dr. Lale ZOR, 17. ve 19. Ünite, Ders Notları, AÖF, Anadolu Üniversitesi, 2004
4	Dr. Kemal Akın ve Dr. Salih Cesur, Laboratuvar Güvenliği Ders Notları, Ankara Üniversitesi, 2004
5	Yrd.Doç.Dr. Memduh Sami TANER Akdeniz Üniversitesi Eğitim Fakültesi Kimya Eğitimi Anabilim Dalı
6	Toxic and Hazardous, Industrial Chemicals Safety Manual, The International Technical Information Institute, 1978
7	Mayo, D. W., Pike, R. M. and Trumper, P. K., "Microscale Organic Laboratory", John Wiley and Sons, Inc., New York, 1994
8	Mohrig, J. R., Hammond, C. N., Morrill, T. C. and Neckers, D. C., Experimental Organic Chemistry, W. H. Freeman and Company, New York, 1999

10	Leonard, J., Lygo, B. and Procter, G., "Advanced Practical Organic Chemistry", 2nd ed., Nelson Thornes, Cheltenham, 2001
11	Erdik, E., Obalı, M., Yüksekışık, N., Öktemer, A., Pekel, T. ve İhsanoğlu, E., "Denel Organik Kimya", 4. baskı, A.Ü. Fen Fakültesi, Ankara, 2001
12	Nüket Öcal ve Feray Aydoğan, Organik Laboratuvar Teknikleri, YTU, 2004.

Week	Weekly Detailed Course Contents	
1	Theoretical	Safety and proper use of laboratory in chemistry laboratory. Measures to be taken while working with hazardous chemicals in terms of laboratory safety and human health
	Practice	Taking precautions such as working under fire extinguishers, gowns, hobs, work plans and observations
2	Theoretical	Classification of chemicals, labeling, storage and usage information
	Practice	Inspection of label images, observation of certain properties of chemicals
3	Theoretical	Labeling, material safety data (MSDSs), information and training
	Practice	Examination of codes and sample chemicals

4	Theoretical	Safety equipment: Personal protective equipment, laboratory safety equipment
	Practice	Examination of safety equipment
5	Theoretical	Laboratory Accidents and First Aid
	Practice	Examination of accident samples and making first aid samples
6	Theoretical	Storage and disposal of waste chemicals
	Practice	Inspection of waste companies of storage materials
7	Theoretical	Introduction, functions, cleaning of glass materials
	Practice	Demonstration and inspection of some glass materials and visuals
8	Theoretical & Practice	Demonstration and inspection of some glass materials and visuals (Midterm Exam)
9	Theoretical	The planning of an experiment, the establishment and implementation of the devices, the points to be noted during the purification of the product,
	Practice	Examination of plan preparation examples, demonstration of product purification processes
10	Theoretical	Establishment of basic laboratory procedures and devices
	Practice	Preparation and examination of some devices
11	Theoretical	Execution and termination of reactions and purification techniques
	Practice	Examination of visual reaction samples and realization of some reactions
12	Theoretical	Execution and termination of reactions and purification techniques
	Practice	Examination of visual reaction samples and realization of some reactions
13	Theoretical	Working under inert atmosphere, working with inert gases, storage and purification of liquids, and considerations for safety
	Practice	Melting and melting point determination, boiling and boiling point determination, freezing and freezing point determination
14	Theoretical	Separation techniques and Introduction to Chromatography
	Practice	Examination of some chromatographic analysis methods

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	1	14
Lecture - Practice	14	0	2	28
Midterm Examination	1	1	2	3
Final Examination	1	3	2	5
Total Workload (Hours)				50
[Total Workload (Hours) / 25*] = ECTS				2

*25 hour workload is accepted as 1 ECTS

Learning Outcomes

1	Students will be informed at the end of the semester on issues of chemistry, hazards, safety precautions and emergency aid. Thus, students will work more consciously and securely in home and business life.
2	Students will learn the necessity of laboratory training, the main rules to be followed and what to do in an emergency
3	Students will have information about planning an experiment, realizing it, and purifying the product.
4	To have knowledge about laboratory accidents and first aid methods
5	Ability to work effectively in multidisciplinary teams individually and have the confidence to take responsibility

Programme Outcomes (Laboratory Technology)

1	To be able to comprehend social, cultural and social responsibilities, to be able to follow national and international contemporary problems and developments
2	Atatürk is bound to Atatürk nationalism in the direction of principles and reforms; Adopting the national, moral, spiritual and cultural values of the Turkish people, open to universal and contemporary developments, the Turkish language is a rich, rooted and productive language; Have a love of language and a consciousness; To have the ability to use as much of a foreign language as he would need to read, taste and habit and professionally.
3	To be able to recognize the basic hardware units and operating systems of a computer, having information about internet usage and preparing documents, spreadsheets and presentations on computer by using office programs.
4	Acquires theoretical and practical knowledge at the basic level in mathematics, science and vocational field.
5	With the knowledge of laboratory technology in the field, he knows and analyzes problems, brings interpretation of data and suggests solutions.
6	In laboratories, according to the prepared business plan and program, necessary work can be done to obtain the desired quality products.
7	To have professional and ethical responsibility in business life.

8 Development and change are open, follow scientific social and cultural innovations, and develop themselves constantly.

Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High
