

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Nutrigenomics							
Course Code		BDB323		Course Level		First Cycle (Bachelor's Degree)			
ECTS Credit	4	Workload	100 ( <i>Hours</i> )	Theory	2	Practice	0	Laboratory	0
Objectives of the Course		To learn gene, gene nutrients, genes and environment, the interaction of genes with diseases							
Course Content		Genetic Variation, Gene, Nutrients and Gene Expression, Nutrigenomics in Efficacy and safety evaluation of Food Components, Genetic Variation and Nutritional Requirement, Vitamin metabolism, genetics and the environment, gene-nutrientinteractions in Type 1 Diabetes, Cancer Nutrigenomics, Genetic Variation and Physical performance							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Discussion, Individual Study					
Name of Lecturer(s)		Lec. Esra ÖRENLİLİ YAYLAGÜL							

### Prerequisites & Co-requisites

ECTS Requisite	90
----------------	----

### Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	40
Final Examination	1	70

### Recommended or Required Reading

1	A.P.Simopoulos, J.M. Ordovas, Nutrigenetics and Nutrigenomics, Karger
---	---

Week	Weekly Detailed Course Contents	
1	Theoretical	Genetic Variation: Nutritional Implication
2	Theoretical	Gene : Enviroment Interactions and Coronary Heart Disease Risk
3	Theoretical	Genes, Diet and Plasma Lipids : The Evidence from Observational Studies
4	Theoretical	Dynamic relationships between the genome and exposure to environments as causes of common human diseases
5	Theoretical	Achieving Balance in the Omega-6/Omega-3 Ratio through Nutrigenomics
6	Theoretical	Nutrients and Gene Expression
7	Theoretical	Nutrigenomics in Efficacy and Safety Evaluation of Foods Components
8	Intermediate Exam	Midterm Exam
9	Theoretical	Genetic Variation and Nutritional Requirement
10	Theoretical	Vitamin Metabolism, Genetics and the Environment
11	Theoretical	Gene-Nutrient Interaction in Type 1 Diabetes
12	Theoretical	Cancer Nutrigenomics
13	Theoretical	Cancer Epigenetics
14	Theoretical	Genetic Variation and Physical Performance
15	Final Exam	Final Exam

### Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	13	4	2	78
Midterm Examination	1	10	1	11

Final Examination	1	10	1	11
Total Workload (Hours)				100
[Total Workload (Hours) / 25*] = ECTS				4
*25 hour workload is accepted as 1 ECTS				

### Learning Outcomes

1	Genetics, Nutrigenetics and learn the concepts of Nutrigenomics.
2	Brings about the results of genetic influence of diet.
3	Understands the effects of diseases of the environment.
4	Investigates the effect of nutrition on the gene.
5	Learn variation genetic and nutritional implication.

### Programme Outcomes (Nutrition and Dietetics)

1	Assess, apply and evaluate the accuracy, reliability and validity of basic knowledge and evidence based current scientific developments on nutrition and dietetics.
2	Assess scientifically the energy and nutrients need of individuals and develop nutrition plans and programs for the clients according to the principles of adequate and balanced nutrition and assessment of energy and nutrient requirements
3	Develop food and nutrition plans and policies for the prevention and promotion of healthy lifestyle applying the methods of nutritional assessment for the population.
4	Assess the nutritional status of the patients, evaluate the clinical symptoms, plan and apply individualized medical nutrition therapy for the patients.
5	Evaluate the factors affecting the quality of food consumed by the individuals and populations from production to consumption and implement the legal standards and legislations on food safety and food security.
6	Consider, interpret and apply the basic scientific knowledge on nutrition and dietetics especially have skills on critical thinking, problem solving and decision making and use effectively the appropriate current technologies and computer, demonstrate skills in preparing research manuscripts, project proposals, collecting and verifying data and writing report.
7	Assess, evaluate and interpret the nutritional status of the individuals and population groups using current knowledge, develop preventive measures, apply medical nutrition therapy, demonstrate active participation, teamwork and contributions with national and international stakeholders in health and social areas, in terms of ethical principles.
8	Plan menus in the institutional food service systems depending on the energy and nutrient requirements of target groups in the scope of nutrition and dietetic principles, take care of food safety in all settings from purchase of food to service, apply appropriate service using technological developments.
9	Develop and use effective strategies for the education, counseling and encouragement of individuals and population groups to facilitate behavior change and choose healthy and safety foods, prepare and update the related educational materials.
10	Apply laboratory work on product development, food analysis and related factors effecting food quality and interpret the results and evaluate them according to the legal arrangements.
11	Plan, manage, evaluate, monitor and report researches and programs to educate and increase and improve the knowledge and awareness of individuals and population groups on healthy nutrition during all lifecycle period, and lead such activities, support and take role in the preparation and implementation of national and international food and nutrition plans and policies.
12	Work and perform duties in the scope of occupational responsibilities and ethical principles, understand the importance of lifelong learning, follow the latest developments (innovations) in science, technology and health, demonstrate professional attributes for the enhancement of nutrition and dietetics profession.
13	Use, apply, discuss and share scientific and evidence based knowledge in nutrition and dietetics practice with team and team members, develop and demonstrate effective skills using oral, print, visual methods in communicating and expressing thoughts and ideas, communicate with all stakeholders within ethical principles. Develop and demonstrate effective communications skills using oral, print, visual, electronic and mass media methods
14	Plan, apply, monitor and evaluate individualized medical nutrition therapy within interdisciplinary approaches, considering the sociocultural, economical status of patients in various age groups and also contribute to clinical researches.

### Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High

	L1	L2	L3	L4	L5
P1	2	4	2	3	4
P2	3	3	2	3	4
P3	3	3	3	4	3
P4	5	3	4	2	3
P5	4	4	4	3	3
P6	4	4	2	3	2
P7	2	2	3	2	4
P8	3	5	3	4	2
P9	2	4	3	4	3
P10	4	3	2	2	2

P11	2	3	4	3	4
P12	3	2	2	3	2
P13	3	4	3	4	3
P14	3	4	2	2	2
