

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

|                                                  |   |                                                                                                                                                                                                     |            |                  |   |                                |   |            |   |
|--------------------------------------------------|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|------------------|---|--------------------------------|---|------------|---|
| Course Title                                     |   | Seminar I                                                                                                                                                                                           |            |                  |   |                                |   |            |   |
| Course Code                                      |   | VBY801                                                                                                                                                                                              |            | Couse Level      |   | Third Cycle (Doctorate Degree) |   |            |   |
| ECTS Credit                                      | 2 | Workload                                                                                                                                                                                            | 45 (Hours) | Theory           | 0 | Practice                       | 2 | Laboratory | 0 |
| Objectives of the Course                         |   | It is aimed that routing the students to selective subject, synthesis the information about the topics, students can be discuss about this subject and can be make presentation about this subject. |            |                  |   |                                |   |            |   |
| Course Content                                   |   | Selection of the subject, to scan of the literature, to collect all information, preparing a report, presentation methods, presentation with participant.                                           |            |                  |   |                                |   |            |   |
| Work Placement                                   |   | N/A                                                                                                                                                                                                 |            |                  |   |                                |   |            |   |
| Planned Learning Activities and Teaching Methods |   |                                                                                                                                                                                                     |            | Individual Study |   |                                |   |            |   |
| Name of Lecturer(s)                              |   | Prof. Pınar Alkım ULUTAŞ, Prof. Serap ÜNÜBOL AYPAK                                                                                                                                                  |            |                  |   |                                |   |            |   |

### Assessment Methods and Criteria

| Method            | Quantity | Percentage (%) |
|-------------------|----------|----------------|
| Final Examination | 1        | 100            |

### Recommended or Required Reading

|   |                |
|---|----------------|
| 1 | web of science |
| 2 | google scholar |

| Week | Weekly Detailed Course Contents |                                                                    |
|------|---------------------------------|--------------------------------------------------------------------|
| 1    | Theoretical                     | Select the subject                                                 |
| 2    | Theoretical                     | To determine the scop of the subject                               |
| 3    | Theoretical                     | To found and eevaluate the articles and books that related subject |
| 4    | Theoretical                     | To found and evaluate the articles and books that related subject  |
| 5    | Theoretical                     | To found and eevaluate the articles and books that related subject |
| 6    | Theoretical                     | To found and eevaluate the articles and books that related subject |
| 7    | Theoretical                     | To found and eevaluate the articles and books that related subject |
| 8    | Theoretical                     | To classiffied the information and prepare a data base             |
| 9    | Theoretical                     | To classiffied the information and prepare a data base             |
| 10   | Theoretical                     | Interpretion of the information                                    |
| 11   | Theoretical                     | To write a review                                                  |
| 12   | Theoretical                     | To write a review                                                  |
| 13   | Theoretical                     | To write a review                                                  |
| 14   | Theoretical                     | Preparation of the presentation                                    |
| 15   | Theoretical                     | Preparation of the presentation                                    |
| 16   | Theoretical                     | Make a presentation                                                |

### Workload Calculation

| Activity                              | Quantity | Preparation | Duration | Total Workload |
|---------------------------------------|----------|-------------|----------|----------------|
| Lecture - Practice                    | 15       | 1           | 2        | 45             |
| Total Workload (Hours)                |          |             |          | 45             |
| [Total Workload (Hours) / 25*] = ECTS |          |             |          | 2              |

\*25 hour workload is accepted as 1 ECTS

### Learning Outcomes

|   |                                                                                                                      |
|---|----------------------------------------------------------------------------------------------------------------------|
| 1 | Student can be extensive search a spesific subject that recommended or selective                                     |
| 2 | Student can be collect information, prepare a new synthesis and write a review about the subject                     |
| 3 | Student can be prepared extensive report, and can be make a presentation                                             |
| 4 | preparing the information compiled in the form of a presentation, application of presentation preparation techniques |

|   |                                                                                                                                           |
|---|-------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | making the word office programs usable according to a certain format while editing and reporting the information obtained on the subject. |
|---|-------------------------------------------------------------------------------------------------------------------------------------------|

**Programme Outcomes (Biochemistry (Veterinary Medicine) Doctorate)**

|    |                                                                                                                                                                                                                                     |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Has a deep and broad knowledge about the field and the interdisciplinary area related with the field through the achievements gained in undergraduate and professional levels.                                                      |
| 2  | Has the knowledge to create original ideas, analyze them and develop definition/product/diagnosis methods by using the knowledge gained in undergraduate and/or professional experience, when needed.                               |
| 3  | Is knowledgeable about theories and practices in methodological and scientific research methods to run an independent research.                                                                                                     |
| 4  | Excels in the laboratory, clinical and similar fields by using the theoretical and practical information gained in former education, and has the ability to create solutions in related fields.                                     |
| 5  | Designs and develops scientific methodology for the advanced level/newly defined/emerged problems about the field.                                                                                                                  |
| 6  | Excels in the known scientific methods in the field for the advanced level/ newly defined/emerged problems.                                                                                                                         |
| 7  | Designs unique researches and implements independently.                                                                                                                                                                             |
| 8  | Analyzes, synthesizes and evaluates the new ideas in related fields by using critical thinking.                                                                                                                                     |
| 9  | Plans, creates teams and carries out the interdisciplinary research projects in order to create solutions to the known/newly defined problems.                                                                                      |
| 10 | Joins to congresses, panels, symposiums, workshops, seminars, article discussions and problem solving sessions in different disciplines, and exchanges information with the other professionals to contribute to the solutions.     |
| 11 | Broadens the borders of scientific information by publishing scientific articles in national and/or international peer-reviewed journals.                                                                                           |
| 12 | Creates new ideas and methods to contribute to the technological, social and cultural progress, or to help the development of information society by using the theoretical, practical, independent research, abilities responsibly. |
| 13 | Designs and implements social projects with the awareness of creating an information society.                                                                                                                                       |
| 14 | Compiles and interprets any type of data (field observation, scientific knowledge etc.) in accordance with the aims.                                                                                                                |
| 15 | Develops and uses strategies about related topics with the field.                                                                                                                                                                   |
| 16 | Implements and defends institutional and practical information and abilities in accordance with the needs of the country and the world, and changes when necessary.                                                                 |
| 17 | Follows up and uses all the updates about the field (scientific information, legislations etc.), and has the qualification to change them.                                                                                          |
| 18 | Adopts lifelong learning as a principle and acknowledges that the information gained through research is the most valuable gain.                                                                                                    |

**Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High**
