

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title	General and Local Anesthetics, Analgesics							
Course Code	VFT627		Couse Level		Third Cycle (Doctorate Degree)			
ECTS Credit 6	Workload	154 (Hours)	Theory	2	Practice	0	Laboratory	0
Objectives of the Course To obtain information on periods of general anesthesia, volatile and gaseous anesthetics, solid anesthetic, dissociative anesthetics, local anesthetics, basic concepts and features.								
Course Content Periods of general anesthesia, volatile and gaseous anesthetics, solid anesthetics, dissociative anesthetics, local anesthetics, basic concepts and properties are investigated.								
Work Placement	N/A							
Planned Learning Activities and Teaching Methods			Explanation (Presentation), Discussion, Case Study, Individual Study, Problem Solving					
Name of Lecturer(s)								

Assessment Methods and Criteria						
Method	Quantity	Percentage (%)				
Midterm Examination	1	40				
Final Examination	1	60				

Reco	mmended or Required Reading
1	1. Veterinary Pharmacology and Therapeutics, 8th Edition, Jim E. Riviere (Editor), Mark G. Papich (Editor), 2009.
2	2. Modern Pharmacology, 6th Edition, Lippincott Williams and Wilkins, 2004 (Ed. C.R. Craig and R.E. Stitzel)
3	Basic and Clinical Pharmacology, 9th Edition, McGraw-Hill, New York, 2004 (Ed. B. Katzung)
4	4. Goodman and Gilman's The Pharmacological Basis of Therapeutics 11th Edition, McGraw-Hill, 2006 (Eds. Brunton, Lazo, Parker, Buxton and Blumenthal)
5	5. Lippincott's Illustrated Reviews: Pharmacology, 3rd Edition, Lippincott Williams and Wilkins, 2005 (Eds. Howard, Mycek, Harvey & Champe)
6	6. The Veterinary Formulary edited by Yolande Bishop. London Pharmaceutical Press in association with the British Veterinary Association 2001.
7	7. Pharmacology. Franklin A. Ahrens. Baltimore, Md. London Williams & Wilkins 1996.
8	8. The physiological basis of veterinary clinical pharmacology J. Desmond Baggot. Oxford Blackwell Science 2001.
9	9. Veterinary pharmaclgy and therapeutics edited by H. Richard Adams. Ames, Iwa Iwa State University Press 2001.
10	Veterinary Drug Therapy, 1994. Ths. B. Barragry.
11	Multiple chice questins in Clinical Pharmacology, 2001, Mant, Lewis and Ritter. Arnld.
12	12. Türk Vademecum, Veteriner İlaç Rehberi, Vet. Hekim. Recai KANDUR; Cansız Hayal Basımevi, 2008.

Week	Weekly Detailed Cour	se Contents					
1	Theoretical	Anesthesia, purpose, and characteristics of anesthesia					
2	Theoretical	Patterns and periods of general anesthesia general anesthetic effect					
3	Theoretical	Gaseous anesthetics are volatile and their properties					
4	Theoretical	Gaseous anesthetics are volatile and their properties					
5	Theoretical	Anesthetics and properties of the solid					
6	Theoretical	Anesthetics and properties of the solid					
7	Theoretical	Article discussion					
8	Intermediate Exam	Midterm exam					
9	Theoretical	Dissociative anesthetics and features					
10	Theoretical	Local anesthesia, basic forms and mechanisms of action					
11	Theoretical	Properties of local anesthetics					
12	Theoretical	Properties of local anesthetics					
13	Theoretical	The other group anestezikler					
14	Theoretical	First aid in anesthesia, anesthesia, according to the clinical picture					
15	Theoretical	Article discussion

Workload Calculation					
Activity	Quantity		Preparation	Duration	Total Workload
Lecture - Theory	14		4	2	84
Assignment	6		5	2	42
Midterm Examination	1		12	2	14
Final Examination	1		12	2	14
	154				
[Total Workload (Hours) / 25*] = ECTS					
*25 hour workload is accepted as 1 ECTS					

Learning Outcomes

- 1 Learn about periods of general anesthesia.
- Learn about volatile anesthetics as well as solid and gas anesthetics, and dissociative anesthetics. 2
- 3 Learn about the local anesthetics, basic concepts and features.
- 4 To find out and use resources about the profession in the area.
- 5 To give lectures and/or presentations and discuss with professionals in the area.

Programme Outcomes (Pharmacology and Toxicology (Veterinary Medicine) Doctorate)

- Gains expert knowledge on field of pharmacology and toxicology in veterinary medicine and, gains expert knowledge on interdisciplinary interaction in pharmacology and toxicology
- To be equipped with the knowledge to develop original ideas about necessary issues in the field by using of both graduate and expertise levels knowledge, to be able to develop original definitions, products and diagnostic procedures, etc. via deepening 2 and questioning these knowledge.
- 3 Develops and uses strategies in his/her field of expertise in PhD Program of Pharmacology and Toxicology
- 4 Reviews, evaluates and interprets any data (field observations, available scientific information etc.) towards a specific purpose.
- Gains expert knowledge on the function and basic pharmacological features of pharmacology and sub-branches of science, 5 relationship between the drug and poison, pharmacokinetic, effects of the drugs, the dose-intensity and dose-effect relationship.
- Gains expert knowledge on the function and basic toxicological features of poison, classifications and types of poisoning, 6 toxicokinetic, general principles of treatment of poisoning.
- 7 Can offer training to technical staff who will work in pharmacology and toxicology laboratory
- 8 Reach to competence to prepare courses at the undergraduate level
- Determines and uses laboratory equipment and consumables in a pharmacology and toxicology laboratory. 9
- To be able to plan an interdisciplinary project and build team for the known or new defined problems and to manage and 10 complete such a project when necessary.
- To share his/her knowledge in the field with others by attending at field-related or other congresses, panels, symposiums, workshops, seminars, article discussions and problem solving sessions, etc., and to contribute to the solution in the team by 11 establishing relations with the experts in different fields.
- To contribute the scientific knowledge in the field via publications in national and international peer-reviewed scientific journals.
- Takes roles in vocational organizations and institution.
- Forms ideas to solve complex problems using theoretical and practical information gained throughout the pharmacology and 14 toxicology education.
- To adopt lifelong learning as a principle and acknowledge that the information gained through research is the most valuable 15 gain.
- Knows and protects rights of ideas and industrial property (patent right) 16

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High

	L1	L2	L3	L4	L5
