

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		First Aid in Obstetrics and Gynecology							
Course Code		VDJ524		Course Level		Second Cycle (Master's Degree)			
ECTS Credit	2	Workload	50 (Hours)	Theory	1	Practice	2	Laboratory	0
Objectives of the Course		teaching Obstetrics and gynecological examination and first aid treatment during examination in domesticated animals							
Course Content		To inform about methods of first aid in obstetrics and gynecology in domesticated animals							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Demonstration, Discussion, Case Study, Individual Study, Problem Solving					
Name of Lecturer(s)									

### Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	20
Final Examination	1	60
Assignment	4	20

### Recommended or Required Reading

1	Alaçam, E. (2002) Doğum ve İnfertilite, Medisan Yayınları, Ankara.
2	Noakes, D.E., Parkinson, T.J., England, G.C.W. (2001) Artur's Veterinary Reproduction and Obstetrics, W.B. Saunders Comp., Philadelphia.
3	Hafez, E.S.E. (1993) Reproduction in Farm Animals, Lea & Febiger, Philadelphia.
4	Dinç, D.A. (2008) Ultrason fiziği ve ineklerde reproduktif ultrasonografi, Pozitif Matbaacılık Ltd. Şti, Ankara.

Week	Weekly Detailed Course Contents	
1	Theoretical	General emergency medicine
	Practice	Drugs which are used for emergency action
2	Theoretical	Obstructions of the respiratory tract
	Practice	Drugs which are used for emergency action
3	Theoretical	Cardiovascular interventions
	Practice	Drugs which are used for emergency actions
4	Theoretical	Reanimation
	Practice	Opening of the vascular way in domesticated animals
5	Theoretical	Obstetric emergency facility in queens
	Practice	Opening of the vascular way in domesticated animals
6	Theoretical	Obstetric emergency facility in bitches
	Practice	Opening of the vascular way in domesticated animals
7	Theoretical	Obstetric emergency facility in ewes
	Practice	Opening of the vascular way in domesticated animals
8	Theoretical	Obstetric emergency facility in goats
	Practice	Opening of the respiratory tract and tracheotomie
9	Practice	Opening of the respiratory tract and tracheotomie
	Intermediate Exam	Intermediate exam
10	Theoretical	Obstetric emergency facility in mares
	Practice	Opening of the respiratory tract and tracheotomie
11	Theoretical	Obstetric emergency facility in queens
	Practice	Probing the rumen and implementation of the torakar
12	Theoretical	Obstetric emergency facility in bitches
	Practice	Probing the rumen and implementation of the torakar
13	Theoretical	Obstetric emergency facility in ewes

13	Practice	Probing the rumen and implementation of the torakar
14	Theoretical	Obstetric emergency facility in goats
	Practice	Repetition of the general practices
15	Theoretical	Obstetric emergency facility in mares
	Practice	Repetition of the general practices
16	Final Exam	Final exam

### Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	1	14
Lecture - Practice	14	0	2	28
Assignment	4	0	0	0
Reading	4	0	1	4
Midterm Examination	1	1	1	2
Final Examination	1	1	1	2
Total Workload (Hours)				50
[Total Workload (Hours) / 25*] = ECTS				2

\*25 hour workload is accepted as 1 ECTS

### Learning Outcomes

1	To be able to learn gynecologic emergency actions in queens and bitches
2	To be able to learn gynecologic emergency actions in ewes and goats
3	To be able to learn gynecologic emergency actions in cows
4	To be able to learn gynecologic emergency actions in mares
5	To be able to learn general medical practices in emergency response
6	To be able to learn resuscitation

### Programme Outcomes (Obstetrics and Gynecology (Veterinary Medicine) Master)

1	Acquiring basic principles and establishing crucial links in the theory and practical aspects in the field of Obstetrics and Gynecology. Getting grip on the animal's reproductive systems, organs, structures and their functional features.
2	Reproductive anatomy of the female animals, embryonic development of the gonads, maturation, cellular and hormonal mechanisms of oogenesis and mechanisms of ovulation and transport of ovum. Sexual cycles of the female animals and their species related differences.
3	Being informed about the fertilisation, early embryonic development, implantation and pregnancy. Fetal development, intrauterine life and detection of risked pregnancies. Learning to deal with the the issues of abortion. Knowing the hormonal and obstetrical aspects of normal parturition. Recognizing dystocia cases and being aware of predisposing and effective etiology of dystocia. Learning the initial approach to dystocia cases and learning to choose the appropriate intervention. Learning to apply the obstetrical methods.
4	Being informed about the puerperium and postpartum periods, learning the physiology and diagnosis and treatment of pathological conditions (metabolic, infectious and traumatic) during the transition period. Learn the ability to perform intrauterine applications. Acquiring right approaches on handling mother and the offspring in the puerperal period. Learning about the care and diseases of the newborn.
5	Gaining experience about the fertility parameters in the farm animals. Being informed about the diagnosis and therapy of infertility cases and management of them in the herd scale. Learning necessary precautions and management practices for establishing the reproductivity as a branch of herd health. Being informed about the effects of nutrition and management on reproduction.
6	Acquiring the knowledge of the hormones and their clinical applications, affecting reproduction directly or indirectly. Learning methods of sexual synchronisation and appropriate timing of insemination or mating. Being able to administer medical and operative contraceptive methods to female animals. Being informed about assisted reproductive techniques.
7	Administering specialized systematic examination of female animals, performing morphologic and functional examination of the female genitalia and mammary glands thus learning the diagnosis of hormonal, infectious, traumatic and tumoral diseases. Gaining skills in surgical therapy or/and elective gynaecological-oncological, udder and teat operations of the related diseases.
8	Having knowledge of the etiology, diagnosis and therapy of mastitis. Learning necessary precautions and management practices to control mastitis incidence in farm animals particularly in dairy enterprises. Having knowledge of etiology, diagnosis and therapy of circulatory disorders and infectious and non-infectious skin diseases.
9	Being informed about frequently used anesthetic methods and anesthetic agents, analgesics, antibiotics, liquid therapy and other medical agents. Gaining skills in solving problems due to reproductive emergency cases, being able to make definitive diagnosis by clinical symptomatic data and administer appropriate therapy in various animal species.
10	Learning methods and principles of scientific research, learn and acquire scientific ethics concept. Being aware of current developments by surveying and analyzing scientific literature. Gaining skills in interpreting classical knowledge of the scientific area to the students and the community.

11	Being able to plan, conduct and accomplish an original scientific study that can deliver novelty, develop a new scientific method or adopt a known method to a new area and present the results as a scientific article, in the area of obstetrics and gynaecology.
