

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title	The Cesarean Se	ection							
Course Code VDJ530			Couse Level		Second Cycle (Master's Degree)				
ECTS Credit 4	Workload 10	00 (Hours)	Theory	,	2	Practice	2	Laboratory	0
Objectives of the Course Explaining the need for caesarean operation in dome					nesticated ani	mals			
Course Content	application t	echniq	ues o	f indication	s of caesarea	an section an	d post-operative c	are in	
Work Placement N/A									
Planned Learning Activities and Teaching Methods				nation (Presentation), Demonstration, Discussion, Case Study, lual Study, Problem Solving				у,	
Name of Lecturer(s)									

Assessment Methods and Criteria					
Method	Quantity	Percentage (%)			
Midterm Examination	1	20			
Final Examination	1	60			
Assignment	4	20			

Reco	mmended or Required Reading
1	Alaçam, E. (2002) Doğum ve İnfertilite, Medisan Yayınları, Ankara.
2	Johnston, S.D., Kustritz, M.V.R., Olson, P.N.S. (2001) Canine and Feline Theriogenoiogy, W.B. Saunders Comp., Philadelphia.
3	Noakes, D.E., Parkinson, T.J., England, G.C.W. (2001) Artur's Veterinary Reproduction and Obstetrics, W.B. Saunders Comp., Philadelphia.
4	Hafez, E.S.E. (1993) Reproduction in Farm Animals, Lea & Febiger, Philadelphia.
5	Dinç, D.A. (2008) Ultrason fiziği ve ineklerde reprodüktif ultrasonografi, Pozitif Matbaacılık Ltd. Şti, Ankara.
6	J. Kevin KEALY, H. Mc ALLISTER (2005) Diagnostic Radiology and Ultrasonography of the Dog and Cat

Week	Weekly Detailed Course Contents					
1	Theoretical	Pregnancy process in farm animals				
	Practice	Examination of a pregnant experimental animal				
2	Theoretical	Birth process and physiology in farm animals				
	Practice	Examination and observing of a pregnant experimental animal and				
3	Theoretical	Uterus inertia and causes of difficult birth and treatment options in farm animals				
	Practice	Intervention to the animal that starts to give birth				
4	Theoretical	Clinical approach to problems that may be encountered at birth in farm animals				
	Practice	Intervention to the animal that starts to give birth				
5	Theoretical	Pregnancy process and physiology in pet aniamls				
	Practice	Examination and observing of a pregnant experimental animal				
6	Theoretical	Uterus inertia and causes of difficult birth in pet animals and treatment options				
	Practice	Intervention to the animal that starts to give birth				
7	Theoretical	Clinical approach to problems that may be encountered at birth in pet animals				
	Practice	Intervention to the animal that starts to give birth				
8	Theoretical	Technique of cesarean section				
	Practice	To show operation technique				
9	Intermediate Exam	Intermediate exam				
10	Theoretical	Cases which require cesarean section in farm animals				
	Practice	Examination of the animal giving birth				
11	Theoretical	Preparation for cesarean section in farm animals				
	Practice	Preparation of animals and materials for caesarean section				
12	Theoretical	Cesarean section in farm animals				
	Practice	caesarean section Practise				

13	Theoretical	cases that require operation cesareean in pet animals					
	Practice	intervention of the animal giving birth					
14	Theoretical	Preparation for cesarean section in pet animals					
	Practice	Preparation of animals and materials for caesarean section					
15	Theoretical	Cesarean section in pet animals					
	Practice	caesarean section Practise					
16	Final Exam	Final exam					

Workload Calculation						
Activity	Quantity	Preparation	Duration	Total Workload		
Lecture - Theory	14	0	2	28		
Lecture - Practice	14	0	2	28		
Assignment	4	0	1	4		
Reading	14	0	2	28		
Midterm Examination	1	4	2	6		
Final Examination	1	4	2	6		
Total Workload (Hours)						
[Total Workload (Hours) / 25*] = <b>ECTS</b>						
*25 hour workload is accepted as 1 ECTS						

Learning Outcomes				
1	To be able to comprehend pregnancy process in domesticated animals			
2	To be able to comprehend problems that may be encountered in pregnancy			
3	To be able to comprehend cases which require surgical intervention during parturition			
4	To be able to comprehend basics and path to be followed for cesarean section			
5	To be able to comprehend medical materials used for cesarean section			
6	To be able to comprehend issues which are to be considered during operations			

## Programme Outcomes (Obstetrics and Gynecology (Veterinary Medicine) Master)

- Acquiring basic principles and establishing crucial links in the theory and practical aspects in the field of Obstetrics and Gynecology. Getting grip on the animal's reproductive systems, organs, structures and their functional features.
- Reproductive anatomy of the female animals, embriyonic development of the gonads, maturation, cellular and hormonal mechanisms of oogenesis and mechanisms of ovulation and transport of ovum. Sexual cycles of the female animals and their species related differences.
- Being informed about the fertilisation, early embriyonic development, implantation and pregnancy. Fetal development, intrauterine life and detection of risked pregnancies. Learning to deal with the the issues of abortion. Knowing the hormonal and obstetrical aspects of normal parturition. Recognizing dystocia cases and being avare of predispozing and effective etiology of dystocia. Learning the initial approach to dystocia cases and learning to choose the appropriate intervention. Learning to apply the obstetrical methods.
- Being informed about the puerperium and postpartum periods, learning the physiology and diagnosis and treatment of pathological conditions (metabolic, infectious and traumatic) during the transition period. Learn the ability to perform intrauterine applications. Acquiring right approaches on handling mother and the offspring in the puerperal period. Learning about the care and diseases of the newborn.
- Gaining experience about the fertility parameters in the farm animals. Being informed about the diagnosis and therapy of infertility cases and management of them in the herd scale. Learning necessary precautions and management practices for establishing the reproductivity as a branch of herd health. Being informed about the effects of nutrition and management on reproduction.
- Acquiring the knowledge of the hormones and their clinical applications, affecting reproduction directly or indirectly. Learning methods of sexual synchrnisation and appropriate timing of insemination or mating. Being able to administer medical and operative contraseptive methods to female animals. Being informed about assisted reproductive techniques.
- Administering specialized systematic examination of female animals, performing morphologic and functional examination of the female genitalia and mammary glands thus learning the diagnosis of hormonal, infectious, traumatic and tumoral diseases. Gaining skills in surgical therapy or/and elective gynaecological-oncological, udder and teat operations of the related diseases.
- Having knowledge of the etiology, diagnosis and therapy of mastitis. Learning necessary precautions and management practices to control mastitis incidence in farm animals particularly in dariy enterprises. Having knowledge of etiology, diagnosis and therapy of circulatory disorders and infectious and non-infectious skin diseases.
- Being informed about frequently used anesthetic methods and anesthetic agents, analgesics, antibiotics, liquid therapy and other medical agents. Gaining skills in solving problems due to reproductive emergency cases, being able to make definitive diagnosis by clinical symptomatic data and administer appropiate therapy in various animal species.

- Learning methods and principles of scientific research, learn and acquire scientific ethics concept. Being avare of current developments by surveying and analyzing scientific literature. Gaining skills in interpreting classical knowledge of the scientific area to the students and the community.
- Being able to plan, conduct and accomplish an original scintific study that can deliver novelty, develop a new scientific method or adopt a known method to a new area and present the results as a scientific article, in the area of obstetrics and gyaecology.

## Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2:Low, 3: Medium, 4: High, 5: Very High
