

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title	Rectal Palpati	on							
Course Code	VDJ531		Couse Level		Second Cycle (Master's Degree)				
ECTS Credit 1	Workload	30 (Hours)	Theory	/	1	Practice	2	Laboratory	0
Objectives of the Course			n of ova	ry and	uterus in	cows and ma	res		
Course Content Rectal axamination of ovary and uterus in co			cows and	d mares					
Work Placement N/A									
Planned Learning Activities and Teaching Methods Ex			Explar Individ	nation (ual Stu	(Presentat udy, Proble	ion), Demons em Solving	stration, Disc	ussion, Case Stud	у,
Name of Lecturer(s)									

Assessment Methods and Criteria				
Method	Quantity	Percentage (%)		
Midterm Examination	1	40		
Final Examination	1	60		

Reco	mmended or Required Reading
1	Alaçam, E. (2002) Doğum ve İnfertilite, Medisan Yayınları, Ankara.
2	Noakes, D.E., Parkinson, T.J., England, G.C.W. (2001) Artur's Veterinary Reproduction and Obstetrics, W.B. Saunders Comp., Philadelphia.
3	Hafez, E.S.E. (1993) Reproduction in Farm Animals, Lea & Febiger, Philadelphia.
4	Dinç, D.A. (2008) Ultrason fiziği ve ineklerde reprodüktif ultrasonografi, Pozitif Matbaacılık Ltd. Şti, Ankara.

Week	Weekly Detailed Cours	se Contents				
1	Theoretical	Anatomy of the ovary and uterus in cows				
	Practice	Clinical practise				
2	Theoretical	Anatomy of the ovary and uterus in mares				
	Practice	Clinical practise				
3	Theoretical	Preparations that should be done before rectal examination				
	Practice	Clinical practise				
4	Theoretical	Ovary and uterus differences according to sexual cycle in cows				
	Practice	Farm application				
5	Theoretical	Repetition of the same subject				
	Practice	Farm application				
6	Theoretical	Repetition of the same subject				
	Practice	Farm application				
7	Theoretical	Ovary and uterus differences according to sexual cycle in mares (Intermediate exam)				
	Practice	Farm application				
8	Theoretical	Repetition of the same subject				
	Practice	Farm application				
9	Theoretical & Practice	Ovary and uterus differences according to pregnancy stages in cows				
10	Theoretical	Ovary and uterus differences according to pregnancy stages in cows				
	Practice	Farm application				
11	Theoretical	Ovary and uterus differences according to pregnancy stages in mares				
	Practice	Farm application				
12	Theoretical	Pathological changes on avry and uterus				
	Practice	Farm application				
13	Theoretical	Pathological changes on avry and uterus				
	Practice	Farm application				
14	Theoretical	Pathological changes on avry and uterus

Workload Calculation				
Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	1	14
Lecture - Practice	14	0	1	14
Midterm Examination	1	0	1	1
Final Examination	1	0	1	1
	30			
	1			
*25 hour workload is accepted as 1 ECTS				

L	earn	ing Outcomes
	1	To be able to comprehend ovary and uterus differences according to sexual cycle
	2	To be able to comprehend ovary and uterus differences according to pregnancy stages
	3	To be able to comprehend ovary pathology
	4	To be able to comprehend uterus pathology with feeling
	5	To be able to comprehend the anatomy of ovary and uterus in mares
	6	To be able to comprehend the anatomy of ovary and uterus in cows

Programme Outcomes (Obstetrics and Gynecology (Veterinary Medicine) Master)

- Acquiring basic principles and establishing crucial links in the theory and practical aspects in the field of Obstetrics and Gynecology. Getting grip on the animal's reproductive systems, organs, structures and their functional features.
- Reproductive anatomy of the female animals, embriyonic development of the gonads, maturation, cellular and hormonal mechanisms of oogenesis and mechanisms of ovulation and transport of ovum. Sexual cycles of the female animals and their species related differences.
- Being informed about the fertilisation, early embriyonic development, implantation and pregnancy. Fetal development, intrauterine life and detection of risked pregnancies. Learning to deal with the the issues of abortion. Knowing the hormonal and obstetrical aspects of normal parturition. Recognizing dystocia cases and being avare of predispozing and effective etiology of dystocia. Learning the initial approach to dystocia cases and learning to choose the appropriate intervention. Learning to apply the obstetrical methods.
- Being informed about the puerperium and postpartum periods, learning the physiology and diagnosis and treatment of pathological conditions (metabolic, infectious and traumatic) during the transition period. Learn the ability to perform intrauterine applications. Acquiring right approaches on handling mother and the offspring in the puerperal period. Learning about the care and diseases of the newborn.
- Gaining experience about the fertility parameters in the farm animals. Being informed about the diagnosis and therapy of infertility cases and management of them in the herd scale. Learning necessary precautions and management practices for establishing the reproductivity as a branch of herd health. Being informed about the effects of nutrition and management on reproduction.
- Acquiring the knowledge of the hormones and their clinical applications, affecting reproduction directly or indirectly. Learning methods of sexual synchrnisation and appropriate timing of insemination or mating. Being able to administer medical and operative contraseptive methods to female animals. Being informed about assisted reproductive techniques.
- Administering specialized systematic examination of female animals, performing morphologic and functional examination of the female genitalia and mammary glands thus learning the diagnosis of hormonal, infectious, traumatic and tumoral diseases. Gaining skills in surgical therapy or/and elective gynaecological-oncological, udder and teat operations of the related diseases.
- Having knowledge of the etiology, diagnosis and therapy of mastitis. Learning necessary precautions and management practices to control mastitis incidence in farm animals particularly in dariy enterprises. Having knowledge of etiology, diagnosis and therapy of circulatory disorders and infectious and non-infectious skin diseases.
- Being informed about frequently used anesthetic methods and anesthetic agents, analgesics, antibiotics, liquid therapy and other medical agents. Gaining skills in solving problems due to reproductive emergency cases, being able to make definitive diagnosis by clinical symptomatic data and administer appropriate therapy in various animal species.
- Learning methods and principles of scientific research, learn and acquire scientific ethics concept. Being avare of current developments by surveying and analyzing scientific literature. Gaining skills in interpreting classical knowledge of the scientific area to the students and the community.
- Being able to plan, conduct and accomplish an original scintific study that can deliver novelty, develop a new scientific method or adopt a known method to a new area and present the results as a scientific article, in the area of obstetrics and gyaecology.

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High
