

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title	Parturition and Dystocia in Ewes and Goats							
Course Code	VDJ632		Couse Level		Third Cycle (Doctorate Degree)			
ECTS Credit 5	Workload	125 (Hours)	Theory	1	Practice	0	Laboratory	0
Objectives of the Course Intervention with correct application a case of normal birth and dystocia in ewes and goats								
Course Content	se Content Intervention methods to applicate normal birth and dystocia in ewes and goats							
Work Placement	N/A							
Planned Learning Activities and Teaching Methods			Explanation	(Presenta	tion), Discussi	on, Individua	al Study	
Name of Lecturer(s)								

Assessment Methods and Criteria					
Method	Quantity Percentage (				
Midterm Examination	1	20			
Final Examination	1	60			
Assignment	4	20			

Reco	mmended or Required Reading
1	1. Alaçam, E. (2002) Doğum ve İnfertilite, Medisan Yayınları, Ankara.
2	Johnston, S.D., Kustritz, M.V.R., Olson, P.N.S. (2001) Canine and Feline Theriogenoiogy, W.B. Saunders Comp., Philadelphia.
3	Noakes, D.E., Parkinson, T.J., England, G.C.W. (2001) Artur's Veterinary Reproduction and Obstetrics, W.B. Saunders Comp., Philadelphia.
4	Hafez, E.S.E. (1993) Reproduction in Farm Animals, Lea&Febiger, Philadelphia
5	Dinç, D.A. (2008) Ultrason fiziği ve ineklerde reprodüktifultrasonografi, Pozitif Matbaacılık Ltd. Şti

Week	<b>Weekly Detailed Cour</b>	se Contents			
1	Theoretical	Anatomy of the reproductive organs (smooth and bone birth canal, development of reproductive organs in ewes and goats)			
2	Theoretical	Examination of female genital organs			
3	Theoretical	Physiology of parturition			
4	Theoretical	Physiological, endocrine order and neural control of birth in animal species			
5	Theoretical	Preparation of fetus for birth			
6	Theoretical	Presentation, position and posture			
7	Theoretical	Symptoms of parturition in goats			
8	Theoretical	Symptoms of parturition in ewes			
9	Intermediate Exam	Intermediate exam			
10	Theoretical	Induction of parturition in goats			
11	Theoretical	Induction of parturition in ewes			
12	Theoretical	Dystocia in ewes and goats			
13	Theoretical	Cesarean section in ewes and goats			
14	Theoretical	Pathology of pregnancy			
15	Theoretical	General repetition			
16	Final Exam	Final exam			

Workload Calculation				
Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	0	1	14
Assignment	4	0	9	36
Reading	14	0	3	42
Midterm Examination	1	10	2	12

Final Examination	1	2	0	1	21
	Total Workload (Hours)				
[Total Workload (Hours) / 25*] = <b>ECTS</b>					
*25 hour workload is accepted as 1 ECTS					

## **Learning Outcomes**

- 1 Knowledge of symptoms related with parturition in ewes and goats
- 2 Informed about physiology of parturition in ewes and goats
- 3 To know the reasons of dystocia and diagnosis methods in in sheep and goats
- 4 Provide knowledge crossing points that transition physiological process to pathology
- 5 Informed about intervention methods of normal birth and dystocia in ewes and goats

## Programme Outcomes (Obstetrics and Gynecology (Veterinary Medicine) Doctorate)

- Acquiring basic principles and establishing crucial links in the theory and practical aspects in the field of Obstetrics and Gynecology. Getting grip on the animal's reproductive systems, organs, structures and their functional features.
- Reproductive anatomy of the female animals, embriyonic development of the gonads, maturation, cellular and hormonal mechanisms of oogenesis and mechanisms of ovulation and transport of ovum. Sexual cycles of the female animals and their species related differences.
- Being informed about the fertilisation, early embriyonic development, implantation and pregnancy. Fetal development, intrauterine life and detection of risked pregnancies. Learning to deal with the the issues of abortion. Knowing the hormonal and obstetrical aspects of normal parturition. Recognizing dystocia cases and being avare of predispozing and effective etiology of dystocia. Learning the initial approach to dystocia cases and learning to choose the appropriate intervention. Learning to apply the obstetrical methods.
- Being informed about the puerperium and postpartum periods, learning the physiology and diagnosis and treatment of pathological conditions (metabolic, infectious and traumatic) during the transition period. Learn the ability to perform intrauterine applications. Acquiring right approaches on handling mother and the offspring in the puerperal period. Learning about the care and diseases of the newborn.
- Gaining experience about the fertility parameters in the farm animals. Being informed about the diagnosis and therapy of infertility cases and management of them in the herd scale. Learning necessary precautions and management practices for establishing the reproductivity as a branch of herd health. Being informed about the effects of nutrition and management on reproduction.
- Acquiring the knowledge of the hormones and their clinical applications, affecting reproduction directly or indirectly. Learning methods of sexual synchrnisation and appropriate timing of insemination or mating. Being able to administer medical and operative contraseptive methods to female animals. Being informed about assisted reproductive techniques.
- Administering specialized systematic examination of female animals, performing morphologic and functional examination of the female genitalia and mammary glands thus learning the diagnosis of hormonal, infectious, traumatic and tumoral diseases. Gaining skills in surgical therapy or/and elective gynaecological-oncological, udder and teat operations of the related diseases.
- Having knowledge of the etiology, diagnosis and therapy of mastitis. Learning necessary precautions and management practices to control mastitis incidence in farm animals particularly in dariy enterprises. Having knowledge of etiology, diagnosis and therapy of circulatory disorders and infectious and non-infectious skin diseases.
- Being informed about frequently used anesthetic methods and anesthetic agents, analgesics, antibiotics, liquid therapy and other medical agents. Gaining skills in solving problems due to reproductive emergency cases, being able to make definitive diagnosis by clinical symptomatic data and administer appropriate therapy in various animal species.
- Learning methods and principles of scientific research, learn and acquire scientific ethics concept. Being avare of current developments by surveying and analyzing scientific literature. Gaining skills in interpreting classical knowledge of the scientific area to the students and the community.
- Being able to plan, conduct and accomplish an original scintific study that can deliver novelty, develop a new scientific method or adopt a known method to a new area and present the results as a scientific article, in the area of obstetrics and gyaecology.

## Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2:Low, 3: Medium, 4: High, 5: Very High
