

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title Reproductive Endoscopy								
Course Code	VDJ645		Couse Level		Third Cycle	Third Cycle (Doctorate Degree)		
ECTS Credit 4	Workload	100 <i>(Hours)</i>	Theory	1	Practice	0	Laboratory	0
Objectives of the Course Usage of endoscopy for rep		roductior	n and teachi	ng evaluation in	domesticated	animals		
Course Content As a diagnostic methods of		endosco	py, techniqu	es and applicati	on			
Work Placement N/A								
Planned Learning Activities and Teaching Methods		Explana	ation (Preser	ntation), Discuss	ion, Individua	l Study		
Name of Lecturer(s)								

Assessment Methods and Criteria

Method	Quantity Per	
Midterm Examination	1	20
Final Examination	1	60
Assignment	4	20

Recommended or Required Reading

1	Alaçam, E. (2002) Doğum ve İnfertilite, Medisan Yayınları, Ankara.
2	Johnston, S.D., Kustritz, M.V.R., Olson, P.N.S. (2001) Canine and Feline Theriogenoiogy, W.B. Saunders Comp., Philadelphia.
3	Noakes, D.E., Parkinson, T.J., England, G.C.W. (2001) Artur's Veterinary Reproduction and Obstetrics, W.B. Saunders Comp., Philadelphia.
4	Hafez, E.S.E. (1993) Reproduction in Farm Animals, Lea & Febiger, Philadelphia.
5	Dinç, D.A. (2008) Ultrason fiziği ve ineklerde reprodüktif ultrasonografi, Pozitif Matbaacılık Ltd. Şti, Ankara.
6	J. Kevin KEALY, H. Mc ALLISTER (2005) Diagnostic Radiology and Ultrasonography of the Dog and Cat

Week	Weekly Detailed Cours	ed Course Contents					
1	Theoretical	Importance of endoscopy					
2	Theoretical	Parts of endoscopy and operating system					
3	Theoretical	Parts of endoscopy and operating system					
4	Theoretical	Parts of endoscopy and operating system					
5	Theoretical	Usage fields of endoscopy					
6	Theoretical	Reproductive endoscopy in bitches					
7	Theoretical	Reproductive endoscopy in queens					
8	Theoretical	Reproductive endoscopy in ewes and goats					
9	Intermediate Exam	Intermediate exam					
10	Theoretical	Reproductive endoscopy in cows					
11	Theoretical	Reproductive endoscopy in mares					
12	Theoretical	Endoscopy of udder health					
13	Theoretical	Endoscopy of udder health					
14	Theoretical	Endoscopic gynecological operations					
15	Theoretical	Endoscopic gynecological operations					
16	Final Exam	Final exam					

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload	
Lecture - Theory	14	0	1	14	
Assignment	4	0	8	32	
Reading	14	0	2	28	
Midterm Examination	1	10	2	12	

				Course Information For
Final Examination	1	12	2	14
Total Workload (Hours)				100
		[Total Workload	(Hours) / 25*] = ECTS	4
*25 hour workload is accepted as 1 ECTS				

Learnin	ng Outcomes
1 ŀ	Knowledge of parts of endoscopy and operating system
2 1	To inform about the use of endoscopy in obstetrics and gynecology
3 (Capable of the use in genital tract pathology
4 k	Knowledge of usage of endoscopy in the fields of reproduction in domesticated animals
5 1	To inform about endoscopy operations in reproduction area

Programme Outcomes (Obstetrics and Gynecology (Veterinary Medicine) Doctorate)

riogi	anime Outcomes (Obstatics and Gynecology (Veterinary Medicine) Doctorate)
1	Acquiring basic principles and establishing crucial links in the theory and practical aspects in the field of Obstetrics and Gynecology. Getting grip on the animal's reproductive systems, organs, structures and their functional features.
2	Reproductive anatomy of the female animals, embriyonic development of the gonads, maturation, cellular and hormonal mechanisms of oogenesis and mechanisms of ovulation and transport of ovum. Sexual cycles of the female animals and their species related differences.
3	Being informed about the fertilisation, early embriyonic development, implantation and pregnancy. Fetal development, intrauterine life and detection of risked pregnancies. Learning to deal with the the issues of abortion. Knowing the hormonal and obstetrical aspects of normal parturition. Recognizing dystocia cases and being avare of predispozing and effective etiology of dystocia. Learning the initial approach to dystocia cases and learning to choose the appropriate intervention. Learning to apply the obstetrical methods.
4	Being informed about the puerperium and postpartum periods, learning the physiology and diagnosis and treatment of pathological conditions (metabolic, infectious and traumatic) during the transition period. Learn the ability to perform intrauterine applications. Acquiring right approaches on handling mother and the offspring in the puerperal period. Learning about the care and diseases of the newborn.
5	Gaining experience about the fertility parameters in the farm animals. Being informed about the diagnosis and therapy of infertility cases and management of them in the herd scale. Learning necessary precautions and management practices for establishing the reproductivity as a branch of herd health. Being informed about the effects of nutrition and management on reproduction.
6	Acquiring the knowledge of the hormones and their clinical applications, affecting reproduction directly or indirectly. Learning methods of sexual synchrnisation and appropriate timing of insemination or mating. Being able to administer medical and operative contraseptive methods to female animals. Being informed about assisted reproductive techniques.
7	Administering specialized systematic examination of female animals, performing morphologic and functional examination of the female genitalia and mammary glands thus learning the diagnosis of hormonal, infectious, traumatic and tumoral diseases. Gaining skills in surgical therapy or/and elective gynaecological-oncological, udder and teat operations of the related diseases.
8	Having knowledge of the etiology, diagnosis and therapy of mastitis. Learning necessary precautions and management practices to control mastitis incidence in farm animals particularly in dariy enterprises. Having knowledge of etiology, diagnosis and therapy of circulatory disorders and infectious and non-infectious skin diseases.
9	Being informed about frequently used anesthetic methods and anesthetic agents, analgesics, antibiotics, liquid therapy and other medical agents. Gaining skills in solving problems due to reproductive emergency cases, being able to make definitive diagnosis by clinical symptomatic data and administer appropriate therapy in various animal species.
10	Learning methods and principles of scientific research, learn and acquire scientific ethics concept. Being avare of current developments by surveying and analyzing scientific literature. Gaining skills in interpreting classical knowledge of the scientific area to the students and the community.
11	Being able to plan, conduct and accomplish an original scintific study that can deliver novelty, develop a new scientific method or adopt a known method to a new area and present the results as a scientific article, in the area of obstetrics and gyaecology.

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High

	L1	L2	L3	L4	L5
