Learning Outcomes

- 1 The meaning of key concepts related to qualitative research techniques.
- 2 To interpret the exchange of research tradition in terms of positivism and the post positivist paradigms.
- 3 To be able to describe the transformation of the scientific research tradition with paradigms change.
- To understand the location and the importance of scientific research in the tradition of qualitative research
- 5 Compare qualitative and quantitative research techniques based on certain criteria.

Programme Outcomes (Educational Administration Supervision Planning and Economics Master's Without Thesis)

- To be able to deepen the collected knowledge related to education toward basic theories and applications of Educational Administration and evaluate the relationships between the theories and applications related to educational administration and supervision.
- To be able to comprehend the relationships between Educational Administration and psychology, sociology, philosophy, management, economy, political sciences and other related disciplines and to carry out interdisciplinary studies by using gained knowledge and abilities related to Educational Administration
- To be able to apply the knowledge obtained to different level educational organizations in order to be developed and be managed effectively
- To be able to identify the problems of educational administration and supervision by using the knowledge obtained in Educational Administration and to develop new point of views by using the knowledge obtained from related disciplines
- To be able to propose solutions to the problems of educational system by using qualitative and quantitative research methods and by mounting the problems of Educational Administration in the problem-solving framework.
- To be able to develop necessary skills of using statistical softwares in order to carry out a scientific research and to use knowledge and communication technologies necessary for sharing knowledge and data
- o be able to develop solution models toward the problems of Educational Administration by using related theories and approaches and to apply these solution models to the total system
- To be able to gain the knowledge necessary for carrying out independent studies in Educational Administration and to apply teamwork skills in order to reach effective results in interdisciplinary studies
