

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title		Divergent Series I							
Course Code		MTK552		Couse Level		Second Cycle (Master's Degree)			
ECTS Credit	7	Workload	175 ( <i>Hours</i> )	Theory	3	Practice	0	Laboratory	0
Objectives of the Course		The aim of this course is to introduce well known summability methods.							
Course Content		Abel convergence, Cesaro convergence, Euler-Maclaurin sum Formula, Abel's inequality, the Silverman-Toeplitz theorem, Nörlund and Nörlund type transformations, Hölder and Cesaro means, Euler, Taylor and Borel exponential transformations, Hausdorff means.							
Work Placement		N/A							
Planned Learning Activities and Teaching Methods				Explanation (Presentation), Discussion, Individual Study, Problem Solving					
Name of Lecturer(s)									

### Assessment Methods and Criteria

Method	Quantity	Percentage (%)
Midterm Examination	1	30
Final Examination	1	50
Assignment	1	20

### Recommended or Required Reading

1	Divergent Series, G. H. Hardy
2	Summability theory and applications, R.E. Powell and S.M. Shah

Week	Weekly Detailed Course Contents	
1	Theoretical	Abel convergence
	Preparation Work	Relevant part of course book should be read
2	Theoretical	Cesaro convergence
	Preparation Work	Relevant part of course book should be read
3	Theoretical	Euler-Maclaurin sum Formula
	Preparation Work	Relevant part of course book should be read
4	Theoretical	Abel's inequality
	Preparation Work	Relevant part of course book should be read
5	Theoretical	Silverman-Toeplitz theorem
	Preparation Work	Relevant part of course book should be read
6	Theoretical	Silverman-Toeplitz theorem
	Preparation Work	Relevant part of course book should be read
7	Theoretical	Nörlund and Nörlund type transformations
	Preparation Work	Relevant part of course book should be read
8	Theoretical	Nörlund and Nörlund type transformations
	Preparation Work	Relevant part of course book should be read
9	Preparation Work	Relevant part of course book should be read
	Intermediate Exam	Midterm Exam
10	Theoretical	Hölder and Cesaro means
	Preparation Work	Relevant part of course book should be read
11	Theoretical	Hölder and Cesaro means
	Preparation Work	Relevant part of course book should be read
12	Theoretical	Euler, Taylor and Borel exponential transformations
	Preparation Work	Relevant part of course book should be read
13	Theoretical	Euler, Taylor and Borel exponential transformations
	Preparation Work	Relevant part of course book should be read
14	Theoretical	Hausdorff means
	Preparation Work	Relevant part of course book should be read

15	Theoretical	Hausdorff means
	Preparation Work	Relevant part of course book should be read
16	Final Exam	Final Exam

**Workload Calculation**

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	3	3	84
Assignment	1	10	2	12
Midterm Examination	1	32	2	34
Final Examination	1	43	2	45
Total Workload (Hours)				175
[Total Workload (Hours) / 25*] = <b>ECTS</b>				7

\*25 hour workload is accepted as 1 ECTS

**Learning Outcomes**

1	To be able to see the relationships among the several summability methods
2	To be able to develop the capacity of posing and solving problems
3	To be able to gain the skill of interpreting some interrelations among these concepts
4	To be able to use mathematical concepts in solving certain types of problems
5	To be able to develop analytical skills and apply to problems

**Programme Outcomes (Mathematics Master)**

1	To be able to have an adequate theoretical and practical domain knowledge.
2	To be able to comprehend the interdisciplinary interaction associated with Mathematics.
3	To be able to use theoretical and practical domain knowledge gained in the field of Mathematics.
4	To be able to interpret knowledge from different disciplines integrating knowledge in the field of mathematics and produce new information.
5	To be able to define, analyse, model and to solve the problems by scientific methods in Mathematics.
6	To be able to conduct a math related specialistic study independently.
7	To be able to develop new strategic approaches to solve problems occurred in unforeseen and complex math-related applications by taking responsibility.
8	To be able to lead in situations that require solving problems related to the mathematics.
9	To be able to criticize his/her knowledge and skills acquired in the field mathematics.
10	To be able to transfer his/her ideas and suggestions for solutions to problems by supporting quantitative or qualitative data verbally and in writing.
11	To be able to communicate both orally and written in a foreign language.
12	To be able to use computer hardware and information technologies with software required by Mathematics.
13	To be able to contribute to the solution of the social, scientific, cultural and ethical problems related to the Mathematics, and being able to support the development of social, scientific, cultural and ethical values.
14	To be able to develop mathematics-related strategies, policies and operational plans, and to evaluate the results obtained within the framework of quality processes.
15	To be able to use his/her knowledge in the field of mathematics and practical problem-solving skills in interdisciplinary studies.

**Contribution of Learning Outcomes to Programme Outcomes 1:Very Low, 2:Low, 3:Medium, 4:High, 5:Very High**

	L1	L2	L3	L4	L5
P1	4	4	4	4	4
P3	5		5	5	5
P5	4	4	4	4	4
P7		4	4	4	4
P9	4		4	4	4
P15		2	2	2	2
