| ECTS Credit 6                                                                                                                                                                           | Workload 150 (Hours)        | Theory    | 2                                  | Practice  | 2 | Laboratory | 0 |
| Objectives of the Course The muscle metabolic system in exercise; Respiration in exercise; The cardiovascular system in exercise; Hormonal changes in exercise; Metabolism in exercise. |                             |           |                                    | exercise; |   |            |   |
| Course Content  Structure and organization of the cardiovascular system, regulation of heart rate and blood pressure acute and chronic responses to exercise is aimed to understand     |                             |           | sure,                              |           |   |            |   |
| Work Placement N/A                                                                                                                                                                      |                             |           |                                    |           |   |            |   |
| Planned Learning Activities                                                                                                                                                             | Explanation                 | (Presenta | tion), Individua                   | l Study   |   |            |   |
| Name of Lecturer(s)                                                                                                                                                                     | Lec. Ferhat ŞİRİNYILDIZ     |           |                                    |           |   |            |   |

| Assessment Methods and Criteria |          |                |  |  |
|---------------------------------|----------|----------------|--|--|
| Method                          | Quantity | Percentage (%) |  |  |
| Midterm Examination             | 1        | 40             |  |  |
| Final Examination               | 1        | 60             |  |  |

| 1      |              |  |
| 2      |              |  |
| 3      |              |  |
| 4      |              |  |
| 5      |              |  |

| Progr | amme Outcomes (Physiology (Medical) Master)                                                                                                                  |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1     | To be able to acquire a background needed for basic physiological research and having the ability to use the teoritical and practical knowledge in the field |
| 2     | To be able to prepare the article in the science of physiology                                                                                               |
| 3     | To be able to present papers in the field of science of physiology                                                                                           |
| 4     | To have professional ethics and responsibility                                                                                                               |
| 5     | To be able to reach a level to follow research in the field, to possess written and spoken communication skills and be able to join discussions              |
