

## AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title Lean Management									
İŞLE523	İŞLE523		Couse Level		Second Cycle (Master's Degree)				
Workload	127 (Hours)	Theory	3	Practice	0	Laboratory	0		
management, To gain ski				ean manufactu	iring tools an				
SMED, Production Smo		ng and Push	/Pull Syste	ms; Lean Logi	stics; Lean N	lanagement Syst	em; Lean		
Work Placement N/A									
Planned Learning Activities and Teaching Methods		Explanation	n (Presenta	tion)					
	<ul> <li>iŞLE523</li> <li>Workload</li> <li>To become le management, the characteri</li> <li>Value Stream SMED, Produ Accounting; L Implementation</li> <li>N/A</li> </ul>	İŞLE523         Workload       127 (Hours)         To become lean philosophy         management, To gain skills         the characteristics of an env         Value Stream Mapping and         SMED, Production Smoothi         Accounting; Lean Product D         Implementations         N/A	İŞLE523       Couse Level         Workload       127 (Hours)         To become lean philosophy of a part of management, To gain skills for implement the characteristics of an environment to         Value Stream Mapping and Process Ans SMED, Production Smoothing and Push Accounting; Lean Product Development Implementations         N/A	İŞLE523       Couse Level         Workload       127 (Hours)       Theory       3         To become lean philosophy of a part of life, To und management, To gain skills for implementation of letthe characteristics of an environment to ensure control value Stream Mapping and Process Analysis; Man SMED, Production Smoothing and Push/Pull Syste Accounting; Lean Product Development; Real Examinplementations         N/A	İŞLE523       Couse Level       Second Cycle         Workload       127 (Hours)       Theory       3       Practice         To become lean philosophy of a part of life, To understand the pr management, To gain skills for implementation of lean manufactu the characteristics of an environment to ensure continuous impro       Value Stream Mapping and Process Analysis; Manufacturing and SMED, Production Smoothing and Push/Pull Systems; Lean Logi Accounting; Lean Product Development; Real Examples of Varior Implementations         N/A	İŞLE523       Couse Level       Second Cycle (Master's D         Workload       127 (Hours)       Theory       3       Practice       0         To become lean philosophy of a part of life, To understand the principles of lear management, To gain skills for implementation of lean manufacturing tools and the characteristics of an environment to ensure continuous improvement       Value Stream Mapping and Process Analysis; Manufacturing and Management SMED, Production Smoothing and Push/Pull Systems; Lean Logistics; Lean N Accounting; Lean Product Development; Real Examples of Various Lean Product Implementations         N/A	İŞLE523       Couse Level       Second Cycle (Master's Degree)         Workload       127 (Hours)       Theory       3       Practice       0       Laboratory         To become lean philosophy of a part of life, To understand the principles of lean manufacturing management, To gain skills for implementation of lean manufacturing tools and methods, To understand the characteristics of an environment to ensure continuous improvement         Value Stream Mapping and Process Analysis; Manufacturing and Management by Cells and Cells SMED, Production Smoothing and Push/Pull Systems; Lean Logistics; Lean Management Syst Accounting; Lean Product Development; Real Examples of Various Lean Production/Managementations         N/A		

### **Assessment Methods and Criteria**

Method	Quantity	Percentage (%)		
Midterm Examination		1	40	
Final Examination		1	60	

#### **Recommended or Required Reading**

1 Mann, D. (2010) Creating a Lean Culture, Tools to sustain Lean Conversions, Productivity Press.

Week	Weekly Detailed Cour	se Contents
1	Theoretical	Introduction to Lean Manufacturing/Management
2	Theoretical	Production Lead Time; The Effect and Inventory Costs
3	Theoretical	Value Stream Mapping and Process Analysis
4	Theoretical	Manufacturing and Management by Cells and Cell Design
5	Theoretical	SMED, Production Smoothing and Push/Pull Systems
6	Theoretical	Lean Logistics
7	Intermediate Exam	Midterm Exams
8	Theoretical	Midterm Exams
9	Theoretical	Lean Management System
10	Theoretical	Lean Product Development
11	Theoretical	Lean Accounting
12	Theoretical	Project Theoretical Presentations - 1
13	Theoretical	Project Theoretical Presentations - 2
14	Theoretical	Real Examples of Various Lean Production/Management Implementations
15	Theoretical	Project Application Presentations – Application Presentations by Teams

## **Workload Calculation**

Activity	Quantity	Preparation		Duration		Total Workload	
Lecture - Theory	14		2	3		70	
Midterm Examination	1		25	1		26	
Final Examination	1		30	1		31	
Total Workload (Hours)						127	
[Total Workload (Hours) / 25*] = <b>ECTS</b>						5	
*25 hour workload is accepted as 1 ECTS							

"25 nour workload is accepted as 1 EC

# Learning Outcomes

- 1 Finding and eliminating wastes
- 2 Holistic seeing at the value chain

		Course Information Form
3	Creating New Strategies for Production Systems	
4	Methods to implement the speed in production systems	
5		

Programme Outcomes (Business Administration Master's Without Thesis)

1	To equip the students from different academic backgrounds with the theoretical and practical information in the fundamental fields of business (i.e. Production management, marketing, accounting and finance, management and organization, and quantitavie me
2	Be able to make finacial analysis in micro and macro level and develop skills in the analyis of the primary and secondary markets; evaluation of the financial structure of the firms and interpretation of accounting reports and financial statements.
3	Be able to use mathematical, statistical and econometric models in the field of business develop skills for interpreting quantitative data, using data in the decision making process and be able to use statistical forecasting methods
4	To have knowledge about the management techniques, be able to assume responsibility in dealing with unforeseeable and complex problems as an individual and group member and develop leadership and communication skills.
5	Be able to understand principles of marketing, marketing research, market share estimation, market segmentation, market positioning, target markets, marketing mix and the place of marketing department in a business organization, the concept of internation
