COURSE INFORMATION FORM**

Course Title	Management Mathematics I						
Course Code	İŞLE503		Couse Level		Second Cycle (Master's Degree)		
ECTS Credit	5	Workload	127 (Hours)	Theory	3	Practice	0
Objectives of the Course	The course prepares students to develop abilities and skills and the accumulation of quantitative decision-making problems in business practice and aims to provide a variety of application areas.						
Course Content	Decision-making in business management, alternatives evaluation, mathematical methods used to determine the most appropriate option to create the infrastructure, analytical thinking skills students will be developed.						
Work Placement	N/A						
Planned Learning Activities and Teaching Methods	Explanation (Presentation), Discussion						
Name of Lecturer(s)

Final Examination	1	60

Recommended or Required Reading

- 1 Schaum's Outline of Theory and Problems of Mathematical Methods for Business and Economics, DOWLING, Edward. T., McGraw-Hill Professional, 1993.

Week	Weekly Detailed Course Contents	
1	Theoretical	Science, mathematics and analytical thinking in terms of operational significance, the use of decision-making problems, the basic concepts of mathematics
	Preparation Work	DOWLING, Edward. T., İşletme Ve İstatistik İçin Matematiksel Yöntemler, Çev. Ö. F. Çolak, M. Yıldırımoğlu, Schaum's Outlines, Nobel Yayın Dağıtım. ERTUĞRUL İrfan, Temel Matematik Ekin Yayıncıları. TAHA Hamdy A., Yöneylem Araştırması, Literatür Yayıncıları.
2	Theoretical	Presentation functions, quadratic functions, business applications,

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	14	2	3	70
Midterm Examination	1	25	1	26
Final Examination	1	30	1	31
Total Workload (Hours)				127
[Total Workload (Hours) / 25*] = ECTS				5

*25 hour workload is accepted as 1 ECTS

Learning Outcomes

1	Providing support for business decision-making problems,
2	Digital information and skills development,
3	Develop the ability of analytical thinking and development,
4	Research, evaluation, mathematical methods used in basic subjects such as supply,
5	Making use of numerical data and graphs, identify problems and solutions in the areas of the business of finding work.
6	Helping to facilitate researching and computing in areas such as accounting, finance, marketing.

Programme Outcomes (Business Administration Master's Without Thesis)

1	To equip the students from different academic backgrounds with the theoretical and practical information in the fundamental fields of business (i.e. Production management, marketing, accounting and finance, management and organization, and quantitatavie me
2	Be able to make finacial analysis in micro and macro level and develop skills in the analysis of the primary and secondary markets; evaluation of the financial structure of the firms and interpretation of accounting reports and financial statements.
3	Be able to use mathematical, statistical and econometric models in the field of business develop skills for interpreting quantitative data, using data in the decision making process and be able to use statistical forecasting methods
4	To have knowledge about the management techniques, be able to assume responsibility in dealing with unforeseeable and complex problems as an individual and group member and develop leadership and communication skills.
5	Be able to understand principles of marketing, marketing research, market share estimation, market segmentation, market positioning, target markets, marketing mix and the place of marketing department in a business organization, the concept of internation
