

AYDIN ADNAN MENDERES UNIVERSITY COURSE INFORMATION FORM

Course Title	se Title Clinical Microbiology I								
Course Code	HEK521 Coust		Couse L	Couse Level Se		Second Cycle (Master's Degree)			
ECTS Credit 6	Workload	150 <i>(Hours)</i>	Theory	2	Pra	actice	3	Laboratory	0
Objectives of the Course To recognize microorganisms that cause disease in man and to distinguish them clinically.									
Course Content Microorganisms that cause disease in man; General and clinical features of bacteria, viruses, fungi, parasites; Clinical diagnostic methods.			ungi,						
Work Placement N/A									
Planned Learning Activities and Teaching Methods Explanation (Presentation), Experiment, Discussion, Individual Study				dy					
Name of Lecturer(s) Lec. Güliz UYAR GÜLEÇ, Lec. Selcen ÖNCÜ									

Assessment Methods and Criteria

Method	Quantity	Percentage (%)	
Midterm Examination	1	40	
Final Examination	1	60	

Recommended or Required Reading

1 Murray Medical Microbiology

Week	Weekly Detailed Co	urse Contents
1	Theoretical	General microbiology
2	Theoretical	Pathogenesis of infection,
3	Theoretical	The general characteristics of the bacteria,
4	Theoretical	The general characteristics of viruses,
5	Theoretical	The general characteristics of fungi,
6	Theoretical	General characteristics of parasites
7	Theoretical	Basic immunology,
8	Theoretical	Midterm exam
9	Theoretical	Approach to infectious diseases,
10	Theoretical	Clinical sampling methods,
11	Theoretical	Painting methods,
12	Theoretical	Culture methods,
13	Theoretical	Serological tests,
14	Theoretical	Molecular tests,
15	Theoretical	Final exam

Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	13	2	2	52
Lecture - Practice	13	1	3	52
Midterm Examination	1	8	2	10
Final Examination	1	35	1	36
Total Workload (Hours) 150				
[Total Workload (Hours) / 25*] = ECTS 6				
to 5 hours and to a difference of the ALEOTO				

*25 hour workload is accepted as 1 ECTS

Learning Outcomes

1	To know the microorganisms that cause human diseases in clinic
2	To be able to detail disease-causing microorganisms by applying appropriate diagnostic methods
3	To know the general characteristics of bacteria
4	To know the general characteristics of viruses

Programme Outcomes (Hospital Infection Control Interdisciplinary Master)

anime outcomes (hospital intection outlior intertaisciplinary master)
Being knowledgeable in the field of hospital infection control and related scientific fields
To be able to use knowledge learned in hospital infection control research area and related science fields
Being knowledgeable about the methods and applications used in the field of hospital infection control
To be aware of the legal practices and details of hospital infection control
To be able to develop different strategies for hospital infection control
Designing and implementing trainings to inform the health personnel and the public in the field of hospital infection control and evaluating the results
To follow current researches in the field of hospital infection control and make critical evaluations
To be able to do team work in the field of hospital infection control, to work together with different disciplines to develop common strategies
To contribute to the solution of social, scientific, cultural and ethical problems in the field of hospital infection control and to support the development of these values
Being able to develop research and learning awareness throughout life and to keep information up-to-date

Contribution of Learning Outcomes to Programme Outcomes 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High

	L1	L2	L3	L4	L5	
P1	5	5	5	5	5	
P2	5	5	5	5	5	
P3	5	5	5	5	5
