Workload Calculation

Activity	Quantity	Preparation	Duration	Total Workload
Lecture - Theory	15	3	0	45

Final Examination	1	10	1	11
Total Workload (Hours)				56
[Total Workload (Hours) / 25*] = ECTS				2
*25 hour workload is accepted as 1 ECTS				

Learning Outcomes

1	To be able to introduce themselves and greet people in different ways.
2	To be able to talk about their hometown and where they live, ask people where they live and where they are from and what their nationality and language are.
3	To be able to talk about the family members using personal pronouns, possessive adjectives and "have got / has got"
4	To be able to talk about free time activities and hobbies, tell their favourite hobbies and ask people about their favourite activities and hobbies.
5	To be able to talk about the days of week and the months of year, tell their birthdays and important days and say which days and months they like or dislike.
6	To be able to tell the places in a city and their locations, and ask people where they are.
7	To be able to ask and tell the time and arrange a meeting with someone.
8	To be able to talk about their abilities and which sport activities they can do and can't do.
9	To be able to form an imperative sentence

Programme Outcomes (Horticulture)

1	To provide practical learning of production and cultivation techniques in the field of horticulture, to introduce the current status of new techniques and to create a perspective based on efficient, economical and quality production techniques for the future
2	To develop the ability to think in the professional field and to gain the ability to produce projects by making innovative approaches
3	To contribute to the development of appropriate breeding strategies in the field of horticulture, especially for sector-based areas, and to provide a perspective for breeding and new variety development in the commercial field
4	To contribute to the possibilities of using technology in the field of horticulture, to create awareness that they can develop activities in the sector in harmony with different disciplines
5	To gain the ability to analyze field work and hypothesis formulation, experiment planning, experiment and research management, data acquisition and evaluation skills related to research topics for the solution of problems encountered in horticultural issues, to shed light on the perspective of their use in public and private sector areas
6	To develop collaboration with different departments in the field of agricultural engineering, to develop the ability to plan research and to work in harmony with different stakeholders in an integrated manner
7	To provide candidates who plan a career in academia, public and private sectors with the skills of research planning, execution and evaluation, report writing, analyzing-understanding-evaluating written reports, and making presentations to sector stakeholders and academia.
8	To gain the ability to create awareness about accessing and developing information and technology within the framework of the principle of lifelong learning
9	To have knowledge about the principles of professional ethics, to gain the ability to make ethical responsibility sustainable throughout professional life
10	To have sufficient knowledge about the quality standards of horticultural crops, evaluation and preservation of products, to have the ability to take initiatives that will create awareness with innovative approaches on these issues
11	To have knowledge about the effects of Agricultural Engineering-Horticulture applications on the environment, human and animal health and sustainable agricultural systems; also to be aware of the legal consequences of engineering solutions to problems
